**Personality in Intimate Relationships** Luciano L'Abate, 2005-05-11 Four decades of contributions to personality theory and family practice have earned Luciano L'Abate a worldwide reputation for therapeutic insights. Now he expands on his pathbreaking relational theory of personality to apply it to the twenty-first century family in all its configurations. *Personality in Intimate Relationships* showcases L'Abate's trademark elegant style and provocative ideas in his most accessible work to date. Based on Axes I and II of the DSM-IV, the book describes relationships along a readily identifiable continuum ranging from optimal functionality to severe pathology, linking the author's conceptual framework to specific diagnostic strategies, therapeutic interventions, and prevention programs. L'Abate's theory not only integrates individual and family theories and seemingly disparate schools of thought but is also inclusive of nontraditional relationships: grandparent-grandchild dyads, adoptive families, same-sex couples, and others that are often left out of the family literature. Among the key areas explored in the book: Selfhood and self-differentiation; Confrontation and sharing of hurt feelings; Negotiating bargaining and problem-solving; Dealing with distance and closeness; Intimacy and the ability to love. In addition, the reader is referred to complementary online appendices that supply helpful questionnaires, workbooks, and ideas for further applications.

*Personality in Intimate Relationships* offers fresh perspective to all frontline practitioners as well as investigators in this area. It is also ideal for graduate courses in abnormal psychology and personal development.

**The Quick Theory Reference Guide** Karin Jordan, 2007 Since the beginning of the concepts of family therapy, mental health professionals have known that the family system is a powerful source of support for change or a powerful force for resistance to change. Some professionals work with individuals, some with families, and some with groups. However, all work with the context of the systems: family, group, community, country, etc. Students, especially beginning students, are overwhelmed and confused at the variety of approaches to working with clients. Many programs introduce students to individual as well as systems concepts in the course of training. Students need assistance in learning this variety of theories. They need to be able to compare and contrast theories and techniques to determine when and where to utilize the best skills in order to facilitate client change. Dr. Karin Jordan has compiled a comprehensive text that enables the students to discover each theory as it is presented in its purist form. The text is accessible yet the content provides comprehensive knowledge of each theory. Dr. Jordan has brought together the master educators and clinicians in our fields to write about their particular expertise.

**Low-Cost Approaches to Promote Physical and Mental Health** Luciano L'Abate, 2007-06-06 Most physical and mental health professionals will agree that their time, space, and funds are generally in short supply even under optimal conditions. Their participants, clients, or patients too will admit to similar deficits of time and patience even with optimal motivation. Overburdened mental health facilities are trying to cope with limited budgets and overworked and underpaid personnel. *Low Cost Approaches to Promote Physical and Mental Health* addresses both sides of this shortfall by offering either self-administered or easily administered

verbal and non verbal interventions designed to promote positive health behaviors while requiring little or no outside funding

**The Self in the Family** Luciano L'Abate, 1997-01-07 In his acclaimed book A Theory of Personality Development Luciano L Abate introduced a revolutionary theory of personality development and functioning that departed radically from traditional theories In place of hypothetical traits existing in an empirical vacuum Dr L Abate offered an image of observable interpersonal competencies functioning within the basic contexts of home work leisure and the marketplace Central to his theory was a developmental model that posited the family as the primordial setting in which propensities are formed and behavior patterns set By defining personality in terms of the growth and interplay of interpersonal competencies the L Abate theory provided an epistemologically and empirically sound basis for understanding personality function and dysfunction as corollaries and extensions of one another In The Self in the Family Luciano L Abate and Margaret Baggett again break new ground by expanding the L Abate theory of personality development to encompass criminal and psychopathological behavior Drawing upon mounting empirical evidence that the family paradigm is the major determinant of personality socialization throughout the life span the authors develop a selfhood model with demonstrable links between the three domains of personality function criminality and psychopathology With the help of the model they show how it is now possible to arrive at a personality based interpretation of most deviant behaviors including criminality psychopathology addictions and even psychosomatic illnesses and they describe various preventive and psychotherapeutic applications for this expanded theory of family based personality
