Demianovich Ouspensky, 1973-01-01 SOME YEARS ago I began to receive letters from readers of my books All these letters contained one question what I had been doing after I had written my books which were published in English in 1920 and 1931 and had been written in 1910 and 1912 I could never answer these letters It would have needed books even to attempt to do this But when the people who wrote to me lived in London where I lived after 1921 I invited them and arranged courses of lectures for them In these lectures I tried to answer their questions and explain what I had discovered after I had written my two books and what was the direction of my work In 1934 I wrote five preliminary lectures which gave a general idea of what I was studying and also of the lines along which a certain number of people were working with me To put all that in one or even in two or three lectures was quite impossible so I always warned people that it was not worth while hearing one lecture or two but that only five or better ten lectures could give an idea of the direction of my work These lectures have continued since then and throughout this time I have often corrected and rewritten them On the whole I found the general arrangement satisfactory Five lectures were read in my presence or without me listeners could ask questions and if they tried to follow the advice and indications given them which referred chiefly to self observation and a certain self discipline they very soon had a quite sufficient working understanding of what I was doing I certainly recognised all the time that five lectures were not sufficient and in talks that followed them I elaborated and enlarged the preliminary data trying to show people their own position in relation to the New Knowledge I found that the chief difficulty for most people was to realise that they had really heard new things that is things that they had never heard before They did not formulate it for themselves but in fact they always tried to contradict this in their minds and translate what they heard into their habitual language whatever it happened to be And this certainly I could not take into account I know that it is not an easy thing to realize that one is hearing new things We are so accustomed to the old tunes and the old motives that long ago we ceased to hope and ceased to believe that there might be anything new And when we hear new things we take them for old or think that they can

be explained and interpreted by the old It is true that it is a difficult task to realize the possibility and necessity of quite new ideas and it needs with time a revaluation of all usual values I cannot guarantee that you will hear new ideas that is ideas you never heard before from the start but if you are patient you will very soon begin to notice them And then I wish you not to miss them and to try not to interpret them in the old way Positive Psychology William C. Compton,Edward Hoffman,2019-01-29 Topically organized Positive Psychology The Science of Happiness and Flourishing presents a highly engaging up to date introduction to positive psychology Authors William C Compton and Edward Hoffman invite students to apply practices to their own lives contexts and experiences to ensure understanding The text examines how positive psychology applies to stressors and health within such traditional research areas as developmental clinical personality motivational social and behavioral psychology Furthermore the text offers perspectives on positive emotional states research and theory on positive traits coverage of positive institutions and a look at the future of positive psychology The Third Edition reflects significant growth in field with hundreds of new references and expanded content on topics including mindfulness money and subjective well being and romantic love **The ABC of Character** Marian Mazur,Tomek,1997 **Handbook of Contemporary Behavioral Economics** Morris Altman, Offering the comprehensive articulation of behavioral economics theory this book includes coverage of critical areas such as the Economic Agent Context and Modeling Decision Making Experiments and Implications Labor Issues Household and Family Issues Life and Death Taxation Ethical Investment and Tipping and more Resources in Education ,1976 *Democracy, Bureaucracy, and Character* William D. Richardson,1997 Most American citizens are quick to criticize federal bureaucracy for its size and inefficiency They assume it has exceeded the intent of our nation s founders yet men like James Madison and Alexander Hamilton knew that good public administrators were essential to good government William Richardson here examines the origins legitimacy and limitations of public administration from the perspective of the Founders thought He shows that these men especially the authors of The Federalist advocated an energetic public administration as an essential component of government and even considered the emergence of a natural aristocracy of virtuous civil servants The Founders would see the fault of today s federal bureaucracy argues Richardson not as much in its size as in the character of its members Richardson relates the Founders belief that the nation should strive to produce public servants committed to developing character traits such as wisdom and moderation that would exemplify the highest ideals of the republic and thus ensure its survival They anticipated some self interest on the part of administrators but believed it would be held in check by public opinion and the political process To test the success of the Founders ideal Richardson examines both the character of administrators and the role of ethics in forming that character He explores the various plans for educating public leaders throughout American history and looks at how attitudes toward public administration have changed in this century from Woodrow Wilson s scientific ideal to recent proposals to downsize government Among other suggestions Richardson advocates reforming existing institutions by emphasizing character

Democracy Bureaucracy and Character is an exercise in legitimizing public administration offering important insights into the Founders thoughts that can be applied to today s debate over government bureaucracy Public administration may be problematic by nature observes Richardson but it is crucial to our form of government Through his analysis we can see that while bureaucracy and democracy have long had an uneasy relationship neither can be effective unless we fully assess the place and purpose of character in the American regime Littell's Living Age ,1894 **The Christ of To-day** George Angier Gordon,1896 Mind in the World David Lethbridge,1992 **Australian National Bibliography** ,1973
