bringing a revolution in transforming the medicine and the health care sector for the better. Students of biomedical research and medicine along with medical professionals will benefit tremendously from the book by gaining from the diverse fields of knowledge of new age personalized medicine presented in the highly detailed chapters of the book. The book chapters are divided into two sections for convenient reading with the first section covering the general aspects of pharmacogenomic technology that includes latest research and development in omics technologies. The first section also highlights the role of omics in modern clinical trials and even discusses the ethical consideration in pharmacogenomics. The second section is focusing on the development of personalized medicine in several areas of human health. The topics covered range from metabolic and neurological disorders to non communicable as well as infectious diseases and even explores the role of pharmacogenomics in cell therapy and transplantation technology. Thirty four chapters of the book cover several aspects of pharmacogenomics and personalized medicine and have taken into consideration the varied interest of the readers from different fields of biomedical research and medicine. Advent of pharmacogenomics is the future of modern medicine which has resulted from culmination of decades of research and now is showing the way forward. The book is an honest endeavour of researchers from all over the world to disseminate the latest knowledge and knowhow in personalized medicine to the community health researchers in particular and the educated public in general.

Algorithms and Models for the Web-Graph
Konstantin Avrachenkov, Debora Donato, Nelly Litvak, 2009-01-26 This volume constitutes the refereed proceedings of the 6th Workshop on Algorithms and Models for the Web Graph WAW 2009 held in Barcelona in February 2009. The World Wide Web has become part of our everyday life and information retrieval and data mining on the Web are now of enormous practical interest. The algorithms supporting these activities combine the view of the Web as a text repository and as a graph induced in various ways by links among pages, links among hosts or other similar networks. We also witness an increasing role of the second generation Web based applications Web 2.0 such as social networking sites and wiki sites. The workshop program consisted of 14 regular papers and two invited talks. The invited talks were given by Ravi Kumar, Yahoo Research USA and Jose Fernando Mendes, University of Aveiro, Portugal. The regular papers went through a thorough review process. The workshop papers were naturally clustered in three sections: Graph Models for Complex Networks, PageRank and Web Graph, and Social Networks and Search. The first section lays a foundation for theoretical and empirical analysis of the Web graph and Web 2.0 graphs.
