Persons Of Consequence Signed:

The Legal Framework and Social Consequences of Free Movement of Persons in the European Union Elspeth Guild, 1998-11 This book marks thirty years of progress in realizing the free movement of persons in the European Union Its origins are to be found in a conference held at King s College London organised by the Immigration Law Practitioners Association and the Centre of European Law at King s College London with the sponsorship of the European Commission The book is divided into two sections the first deals with the implementation of rights of nationals in the European Union to move reside and exercise economic activities in other Member States The second part looks at the development of European law regulating the movement residence and economic activities of third country nationals within the territory of the Union Each of the two parts in its own way analyzes the relation of the black letter law to the social consequences attendant on migration within the European Union This is an invaluable analysis for practitioners and academics concerned with the development of a legal regime on migration in the European Union Signs, Mind, and Reality Sebastian Shaumyan, 2006-01-01 The book presents a new science of semiotic linguistics The goal of semiotic linguistics is to discover what characterizes language as an intermediary between the mind and reality so that language creates the picture of reality we perceive The cornerstone of semiotic linguistics is the discovery and resolution of language antinomies contradictions between two apparently reasonable principles or laws Language antinomies constitute the essence of language and hence must be studied from both linguistic and philosophical points of view The basic language antinomy which underlies all other antinomies is the antinomy between meaning and information Both generative and classical linguistic theories are unaware of the need to distinguish between meaning and information By confounding these notions they are unable to discover language antinomies and confine their research to naturalistic description of superficial language phenomena rather than the quest for the essence of language Series A *Consequences of Language* N. J. Enfield, Jack Sidnell, 2022-11-22 What is it about humans that makes language possible and what is it about language that makes us human If you are reading this you have done something that only our species has evolved to do You have acquired a natural language This book asks How has this changed us Where scholars have long wondered what it is about humans that makes language possible N J Enfield and Jack Sidnell ask instead What is it about humans that is made possible by language In *Consequences of Language* their objective is to understand what modern language really is and to identify its logical and conceptual consequences for social life Central to this undertaking is the concept of intersubjectivity the open sharing of subjective experience There is Enfield and Sidnell contend a uniquely human form of intersubjectivity and it is essentially intertwined with language in two ways a primary form of intersubjectivity was necessary for language to have begun evolving in our species in the first place and then language through its defining reflexive properties transformed the nature of our intersubjectivity In the authors analysis social accountability the bedrock of society is grounded in this linguistically transformed enhanced kind of intersubjectivity The account of the language mind
