Perspectives In Zoology:

Posthumanist Perspectives on Literary and Cultural Animals Krishanu Maiti, 2021-09-11 This book offers Posthumanist readings of animal centric literary and cultural texts The contributors put the precepts and premises of humanism into question by seriously considering the animal presence in texts The essays collected here focus primarily on literary and cultural texts from varied theoretically informed interdisciplinary perspectives advanced by critical approaches such as Critical Animal Studies and Posthumanism Contributors select texts that cut across geographical and period boundaries and demonstrate how practices of close reading give rise to new ways of thinking about animals By implicating the animal turn in the field of literary and cultural studies this book urges us to problematize the separation of the human from other animals and rethink the hierarchical order of beings through close readings of select texts It offers fresh perspectives on Posthumanist theory inviting readers to revisit those criteria that created species difference from the early ages of human civilization This book constitutes a rich and thorough scholarly resource on the politics of representation of animals in literature and culture The essays in this book are empirically and theoretically informed and explore a range of dynamic captivating and highly relevant topics Comprising over 15 chapters by a team of international contributors this book is divided into four parts Contestation over Species Hierarchy and Categorization Animal Re constructions Interspecies Relationalities Intersectionality Animal and Gender This book will be essential reading for students and researchers of Critical Animal Studies and Environmental Studies

Perspectives in Zoology Alan Boyden, 2013-10-22 *Perspectives in Zoology* tries to discuss in a critical way some of the aspects of biology that lack perspective The book also calls into attention the possibilities of obtaining a more correct view and challenges views that already have already been accepted by the scientific community In this thought provoking book many questions are raised and different viewpoints and their implications are considered in the areas of natural history Coverage includes the great ages of evolution the primitive evolution in the eumatozoa the morphological comparisons between homology and analogy systematic serology and its principles and the relationship of systemics evolution and phylogeny The text is recommended for students and professors that deal with biology zoology genetics and evolution who not only wish to explore and understand other approaches to popular theories in zoology but also wish to be more familiarized and delve deeper with the common yet frequently discussed and debated topics in the field
