Wo ein Sprichwort ist ist auch ein Muster Korpusbasierte Studien zur Produktivität und Schematisierung deutscher Sprichwortmuster

Abstract This article focuses a certain type of phraseological construction that has only been marginally investigated in phraseological research so far productive partially schematic units that go back to lexically fully specified phrasemes that due to the popularity of the modification of certain positions have developed over time into phrasemes with conceptual slot positions that require a separate cognitive anchoring i.e. constitute an independent lexicon entry On the basis of an exemplary selection of German proverbs like Ein Unglück kommt selten allein lit A misfortune never comes alone that are taken from the Sprichwörterbuch of the IDS dictionary platform OWID vgl. SWB it will be shown that through serially and systematically operated modification processes proverbs have even created a considerable amount of semi schematic patterns that are used more or less productively With recourse to Stumpff's 2016 distinction between modification patterns Modifikationsmuster and phraseological schemata Modellbildungen it will be argued on empirical grounds that said patterns underly different degrees of productivity and schematicity in that some of them represent only modification series of the lexically specified proverb base and thus are located as a phenomenon on the parole level and others constitute true phraseological constructions with an intrinsic vacancy structure that expand the lexicon and therefore have the status of a system level phenomenon The central method used here are slot analyses carried out by the corpus linguistic tool Lexpan Steyer Brunner 2014 which allows for the differentiation of modified and schematic phrasemes on the basis of certain frequency values In addition timeline graphs Lingen Keibel 2014 are used which can be particularly useful in classifying transition phenomena by visualizing the annual development of modifications over the last decades

Lirim Selmani Der koranische Imperativ qul und seine Wiedergabe im Deutschen sprechhandlungstheoretisch betrachtet

Abstract In the Qoran commands are commonly used by the divine speaker to address Mohammed and further addressees The imperative mode is used frequently especially the imperative say qul The imperative is a linguistic device which is specific to discourses Hence it will be argued that the Qoran is a discourse rather than a text in the proper sense The qul speech is closely related to the unwillingness of the addressees who do not believe in the prophethood of Mohammed In German there are three lexicalized verbs for Arabic qul sagen sprechen reden These verbs differ semantically from each other sagen puts the focus on the addressee sprechen puts the focus on the proposition and reden indicates a bidirectional communication It will be shown how

the Qoranic imperative qul is translated into German Rezensionen Harro Stammerjohann Raffaele Simone 2020 Il software del linguaggio Raffaele Simone 2022 La grammatica presa sul serio Come nata come funziona e come cambia Cornelia Loos Josep Quer Annika Herrmann Roland Pfau 2020 The Routledge handbook of theoretical and experimental sign language research Vilma Symanczyk Joppe Sonja Taigel 2021 Ikonizit t Informationen und Hinweise von Klaus M llner und den Herausgeber innen *Human Values and the Design of Computer Technology* Batya Friedman,1997-12-13 Human values including accountability privacy autonomy and respect for person emerge from the computer systems that we build and how we choose to use them Yet important questions on human values and system design have remained largely unexplored If human values are controversial then on what basis do some values override others in the design of for example hardware algorithms and databases Do users interact with computer systems as social actors If so should designers of computer persona and agents seek to build on such human tendencies or check them How have design decisions in hospitals research labs and computer corporations protected or degraded such values This volume brings together leading researchers and system designers who take up these questions and more *Zeitschrift für Vermessungswesen.
