This new edition draws on articles in *The International Encyclopedia of Education* 2nd Edition described by Choice as being a premier resource when judged on virtually every criteria applied to a reference work. All articles have been revised and updated. Adult education has undergone tremendous changes over the past decade not only has expenditure and participation increased at a global level but the field itself has also matured. Continuing vocational education and workplace learning have assumed increased significance and as a result several new topics for research on adult education have emerged. The many changes in the field are reflected in this volume. The entries will not only cover the important concepts and definitions in the field but offer a disciplinary perspective on its development. Adults in Higher Education Pat Davies, 1995. Essays describe the policies and practices of European countries and Australia regarding adult access to higher education, questioning whether mature student participation has resulted in inequalities among different sections of the population and whether adult students in higher education are likely to be there because of previous advantages. Other topics include admissions procedures, patterns of participation, alternative provision for adults, and funding. Annotation copyright by Book News Inc, Portland, OR.
