Three Views on Creation and Evolution Zondervan, 2010-06-01 For Christians the issues raised by the different views on creation and evolution are challenging Can a young earth be reconciled with a universe that appears to be billions of years old Does scientific evidence point to a God who designed the universe and life in all its complexity Three Views on Creation and Evolution deals with these and similar concerns as it looks at three dominant schools of Christian thought Proponents of young earth creationism old earth creationism and theistic evolution each present their different views tell why the controversy is important and describe the interplay between their understandings of science and theology Each view is critiqued by various scholars and the entire discussion is summarized by Phillip E Johnson and Richard H Bube The Counterpoints series provides a forum for comparison and critique of different views on issues important to Christians Counterpoints books address two categories Church Life and Bible and Theology Complete your library with other books in the Counterpoints series

v.1-8. History of man John Clark Ridpath, 1896 **Evolutionary Creation in Biblical and Theological Perspective** Dan Liroy, 2011 This book undertakes a biblical and theological analysis of evolutionary creation and creation themes pertinent to origins science A key premise is that a fundamental congruity exists between what the Lord has revealed in nature i.e. the book of God's work and in Scripture i.e. the book of God's Word A corollary supposition is that based on an analysis of the fossil record genome evidence morphological data and so on biological evolution offers the best persuasive scientific explanation for the origin and actualization of carbon based life on earth including Homo sapiens i.e. modern humans Furthermore considering evolutionary creation in an objective balanced and informed manner reveals that the view is wholly compatible with classical theological metaphysics including Augustinian and Reformed confessional orthodoxy

Evangelicals and Science Michael Roberts, 2008-03-30 Most people when they think about the purported conflict between science and religion would most likely think first of evangelical Protestantism Because of the prominent place evolution versus creationism and such events as the Scopes Trial has had in the debates over science and religion many people think of evangelicals as hostile to science As with other volumes in the Greenwood Guides to Science and Religion series this work addresses the more complex interworkings between modern science and evangelical Christianity Evangelicals and Science provides a thorough overview of the history of the relationship between these two dominant forces in public life including chapters on evangelicals the Bible and science evangelicals and geology the rise of Creationism and evangelicals and modern science The volume includes primary source documents to give readers a flavor of the writings of
