Perspectives On Arabic Linguistics Ii Papers From The Second Annual Symposium:

Perspectives on Arabic Linguistics Mushira Eid, John McCarthy, 1990-01-01 The papers in this volume approach the study of Arabic its structure and use from different linguistic and sociolinguistic perspectives The book is divided into three sections Section I Morphological and Phonological Perspectives Section II Semantic Perspectives Section III Sociolinguistic Perspectives Perspectives on Arabic Linguistics II Mushira Eid, John McCarthy, 1990 New Perspectives on Arabic Linguistics II Mushira Eid, John J. McCarthy, 1990 Towards a Critical Sociolinguistics Rajendra Singh, 1996 This collection of twelve essays some of which have been written specifically for this volume by well known European and North American sociolinguists reflects an increasing recognition within the field that sociological and theoretical innocence can no longer be underwritten by it and offers a multi pronged and multi methodological way to move towards a critical reflexive and theoretically responsible socio linguistics It explores with courage and sensitivity some very important areas in the enormous space between Bloomfieldian idiolect and Chomskyan UG in order to situate the human linguistic enterprise and offers valuable insights into human linguisticity and sociality These explorations expose the limits of correlationism determinism and positivistic reificationism and offer new ways of doing sociolinguistics Intended for both practicing and future sociolinguists it is an ideal text book for the times particularly for graduate and advanced undergraduate students **On Subject and Theme** Ruqaiya Hasan, Peter H. Fries, 1995-11-23 The ten papers in this volume focus on Subject and Theme Theme began its life as a semantic notion in the work of Vil m Mathesius while Subject has traditionally been seen as just a syntactic entity More recently two related perspectives on these concepts have attracted linguists attention the formal criteria for their recognition and the relations between the two concepts Using the systemic functional model as their point of departure the papers in the present volume consider the two notions in a wider context by relating them to the interpersonal and textual metafunctions of language By contrast with the current linguistic approaches the primary focus here is neither simply on formal recognition criteria nor on the relation of these elements to each other instead the notions of Subject and Theme are examined from the point of view of their function in the economy of discourse with studies of their significance in English and French as well as in a range of non Indo European languages Definitions of the concepts are offered on the basis of their discourse functions which are also important in selecting the formal recognition criteria and in understanding their mutually supportive role vis vis each other Most of the papers in the volume are a selection from presentations made at the 19th International Systemic Functional Congress at Macquarie University Language and Ideology René Dirven, Bruce Wayne Hawkins, Roslyn M. Frank, Esra Sandikcioglu, Cornelia Ilie, 2001-01-01 Together with its sister volume on Theoretical Cognitive Approaches this volume explores the contribution which cognitive linguistics can make to the identification and analysis of overt and hidden ideologies This volume shows that descriptive tools which cognitive linguistics developed for the analysis of language in use are highly efficient for the analysis of ideologies as well Amongst them are the concept of

grounding and the speaker's deictic centre iconographic reference frames cultural cognitive models as a subgroup of Idealized Cognitive Models conceptual metaphors root metaphors frames as groups of metaphors mental spaces and conceptual blending The first section Political metaphor and ideology discusses topics such as Nazi Germany discrimination of Afro Americans South Africa's rainbow nation and the impeachment campaign against President Clinton The second section on cross cultural Otherness deals with cultural clashes such as those between the Basque symbolic world and the general European value systems between the Islam and the West determining its treatment of Iraq in the Gulf War and between Hong Kong Otherness and centuries of Western dominance The third section deals with Metaphors for institutional ideologies and concentrates on the globalisation of the North and South American markets on insults in un parliamentary debates and on the Internet being for sale

Textual Parameters in Older Languages Susan C. Herring, Pieter van Reenen, Lene Schøsler, 2001-01-23 Textual Parameters in Older Languages takes a contemporary approach to the inherent limitations of using older texts as data for linguistic analysis drawing on methods of text analysis pragmatics and sociolinguistics to supplement traditional historical and philological methods The focus of the book is on the importance of controlling for textual parameters defined by the editors as dimensions of variation associated with texts and their production including text type degree of poeticality orality and dialect in the analysis of older language data Failure to do so can result in invalid generalizations recognizing the influence of textual parameters conversely raises a myriad of issues for the practice and theory of historical linguistics The 12 essays in this collection apply this approach in analyses of anaphora non finite verbal forms particles punctuation word order and other phenomena in a wide range of languages including Ancient Tamil Sanskrit Latin Heian Japanese Medieval Greek Old French Old Russian Middle English and Modern Danish An in depth introduction by the editors lays out the goals of the textual parameters approach and considers the methodological and theoretical consequences of the evidence presented in the book as a whole

Computational Nonlinear Morphology George Anton Kiraz, 2001-12-17 By the late 1970s phonologists and later morphologists had departed from a linear approach for describing morphophonological operations to a nonlinear one Computational models however remain faithful to the linear model making it very difficult if not impossible to implement the morphology of languages whose morphology is nonconcatenative Computational Nonlinear Morphology aims at presenting a computational system that counters the development in linguistics It provides a detailed computational analysis of the complex morphophonological phenomena found in Semitic languages based on linguistically motivated models
