Perspectives On Humanitarian Military Intervention:

Perspectives on Humanitarian Military Intervention George R. Lucas, Anthony C. Zinni, 2001 **Humanitarian Military Intervention** Taylor B. Seybolt, 2007 Military intervention in a conflict without a reasonable prospect of success is unjustifiable especially when it is done in the name of humanity Couched in the debate on the responsibility to protect civilians from violence and drawing on traditional just war principles the central premise of this book is that humanitarian military intervention can be justified as a policy option only if decision makers can be reasonably sure that intervention will do more good than harm This book asks Have past humanitarian military interventions been successful It defines success as saving lives and sets out a methodology for estimating the number of lives saved by a particular military intervention Analysis of 17 military operations in six conflict areas that were the defining cases of the 1990s northern Iraq after the Gulf War Somalia Bosnia and Herzegovina Rwanda Kosovo and East Timor shows that the majority were successful by this measure In every conflict studied however some military interventions succeeded while others failed raising the question Why have some past interventions been more successful than others This book argues that the central factors determining whether a humanitarian intervention succeeds are the objectives of the intervention and the military strategy employed by the intervening states Four types of humanitarian military intervention are offered helping to deliver emergency aid protecting aid operations saving the victims of violence and defeating the perpetrators of violence The focus on strategy within these four types allows an exploration of the political and military dimensions of humanitarian intervention and highlights the advantages and disadvantages of each of the four types Humanitarian military intervention is controversial Scepticism is always in order about the need to use military force because the consequences can be so dire Yet it has become equally controversial not to intervene when a government subjects its citizens to massive violation of their basic human rights This book recognizes the limits of humanitarian intervention but does not shy away from suggesting how military force can save lives in extreme circumstances On State Secession from International Law Perspectives Jing Lu, 2018-10-30 This book provides essential legal information on state secession in an innovative manner unlike conventional approaches which invariably focus on whether there is a right to secession here the discussion centers on how secessionist conflicts can be effectively resolved To that end the book not only reveals the inadequacy of the current international legal framework but also carefully considers how relevant actors can work to improve the legal system In short it argues that secessionists and non secessionists should conclude an agreement to reconcile their conflicting rights to self determination while external actors should do their utmost to ensure the success of these efforts Positive external involvement requires external actors to refrain from the use of force and to participate more rationally in secessionist conflicts Given its subject matter the book will appeal to a broad readership including students and researchers in international law international relations and ethnic studies as well as enthusiasts in these fields *Law in Perspective* Michael Head, Scott Mann, 2008 Chiefly written as a

International Law & Trade Perspective ,2002 **Cosmopolitanism** Robert Fine,2007-10-30 The idea of cosmopolitanism has informed some of the most important developments in current sociology It has changed the way in which we think about a vast array of issues the forces of globalization the resurgence of nationalism the future of political community in Europe the role of international law in social life changing forms of violence and even the life of the mind This book explains what cosmopolitanism is and why it has grabbed the sociological imagination Robert Fine explores the concept of cosmopolitanism and its application to a range of contemporary issues including the future of Europe the role of human rights global governance and perpetual peace in the construction of a cosmopolitan order crimes against humanity the justification of humanitarian military interventions the extension of democracy beyond national limits This book offers an innovative mix of theoretical and socio political elements that will be of great interest to students and researchers in the fields of international political theory international relations social theory and cultural studies

Regional Security Perspective, National Missile Defence (NMD), Theatre Missile Defence (TMD) Systems, and the Future of International System ,2004 *Perspectives on Power* Heather M. Morgan,Jernej Letnar Černič,Lindsay Milligan,2010 Although power TM can appear a vague term the dichotomy between haves and have nots the desire to gain autonomy and the dire consequences of subjugation are three issues that resound across the arts and social sciences In this book postgraduate students from the constituent disciplines use the freedom of their positions as early career researchers to boldly explore power relations From a legal perspective papers are included geared towards human rights issues and violations Further the applied perspectives from business and education researchers consider how access to wealth and education and to equal education can and must be achieved Then interpreted through the perspectives of anthropological sociological and historical approaches power has become a resonant issue among the creations of culture and human interaction s Finally within the soft TM sciences the very same preoccupations as they appear in creative expression are examined within literature and music Indeed through the twenty one articles chosen for inclusion in this collection distinct in their disciplinary origins approaches and foci together the authors are emphasising the many similarities that exist among the arts and social sciences subjects

Perspectives on Power An Interdisciplinary Approach TM was conceived as a result of the quality and reception of papers presented at the 2008 Moving Forward Postgraduate Conference held at the University of Aberdeen The volume comprises twenty one articles on the theme of power TM carefully chosen by the editorial team from in excess of eighty presentations These represent and tender a wide range of scholarly approaches to and within the arts and social sciences the remit of Moving Forward The collection is aimed at scholars and scholarly institutions within the United Kingdom in particular but contains contributions from scholars across the globe The collection should especially appeal to and inspire delegates visiting the Moving Forward Postgraduate
