*Continuing Medical Education* Dennis K. Wentz,2011 The only full scale history of continuing medical education and its future

*Medicine And The Family: A Feminist Perspective* Lucy M. Candib,1999-10-12 For centuries traditional medicine has been infused with a masculine bias often to the disadvantage of both doctors and patients This book challenges prevailing views and offers a family oriented feminist approach to the practice of medicine Drawing on her 20 years of experience as a family doctor the author dissects the assumptions underlying current teachings about child and adult development sexual abuse the family life cycle and family systems She exposes the ways in which women are often ignored subordinated or blamed in the modern medical system For example she notes that women are often held solely responsible for all problems in their families including child abuse and battering

**Faculty Development in the Health Professions** Yvonne Steinert,2025-04-07 This second edition of Faculty Development in the Health Professions originally published in 2014 presents updated chapters and new topics It also highlights changes in the evidence base for faculty development and identifies recommendations for research and practice in the field With chapter authors coming from five continents it builds on and presents global lessons learned for an international audience This book describes a multitude of ways ranging from workshops to the workplace in which health professionals can develop their knowledge and skills as teachers and educators leaders and managers and researchers and scholars By providing an informed and scholarly overview of faculty development and by describing original content that has not been previously published this book helps to ensure that research and evidence inform practice move the scholarly agenda forward and promote dialogue and debate in this evolving field It serves as an invaluable resource for faculty development program planning implementation and evaluation and helps to sustain faculty members vitality and commitment to excellence

**The Use of Coercive Measures in Forensic Psychiatric Care** Birgit Völlm,Norbert Nedopil,2016-05-02 This book presents the legal context and describes the ethical and practical challenges when using coercive measures in forensic psychiatric settings A wide range of aspects relevant to the use of such measures including environmental patient

related and staff related factors are explored and the experience of coercive interventions is described from the staff and the patient perspective Differences in jurisdictions and examples of good practice are highlighted The authors are from a range of professional backgrounds ensuring breadth as well as depth in discussion of the topic The use of coercive measures in particular restraint seclusion and involuntary medication for the control of aggression in psychiatry remains controversial Forensic mental health care deals with individuals who pose a risk to others and often present with significant management problems within institutions The care of patients in these settings gives rise to debates about the balance between care and safety and between the interests of the patients and those of the wider society to be protected Despite these tensions limited research has been conducted specifically on the use of coercive measures in forensic mental health care This volume aims to fill the gap and will be of value to all professionals working in forensic psychiatric settings as well as to those working in general psychiatric and custodial settings law professionals and patients **Monographic Series** Library of Congress,

Medical Sociology in Africa Jimoh Amzat, Oliver Razum, 2014-07-08 This book presents a comprehensive discussion of classical ideas core topics currents and detailed theoretical underpinnings in medical sociology It is a globally renowned source and reference for those interested in social dimensions of health and illness The presentation is enriched with explanatory and illustrative styles The design and illustration of details will shift the minds of the readers from mere classroom discourse to societal context the space of health issues to consider the implications of those ideas in a way that could guide health interventions The elemental strengths are the sociological illustrations from African context rooted in deep cultural interpretations necessitated because Africa bears a greater brunt of health problems More so the classical and current epistemological and theoretical discourse presented in this book are indicative of core themes in medical sociology in particular but cut across a multidisciplinary realm including health social sciences e g medical anthropology health psychology medical demography medical geography and health economics and health studies medicine public health epidemiology bioethics and medical humanities in general Therefore apart from the book s relevance as a teaching text of medical sociology for academics it is also meant for students at various levels and all health professionals who require a deeper understanding of social dimensions of health and illness with illustrations from the African context and sociological contributions to health studies in general **Disease, Medicine and Empire** Roy Malcolm MacLeod, Milton James Lewis, 2022-05-25 Originally published in 1988 the essays in this book focus primarily on colonial medicine in the British Empire but comparative material on the experience of France and Germany is also included *Perspectives* ,1991

Applied Perspectives on Help-Seeking and -Receiving Arie Nadler, Jeffrey D. Fisher, Bella M. DePaulo, 1983 *Medical Humanities, Sociology and the Suffering Self* Wendy Lowe, 2020-12-22 Following criticisms of the traditionally polarized view of understanding suffering through either medicine or social justice Lowe makes a compelling argument for how the medical humanities can help to go beyond the traditional biographical and epistemic breaks to see into the nature and properties of

suffering and what is at stake Lowe demonstrates through analysis of major healthcare workforce issues and incidence of burnout how key policies and practices influence healthcare education and experiences of both patients and health professionals By including first person narratives from health professionals as a tool and resource she illustrates how dominant ideas about the self enter practice as a refusal of suffering Demonstrating the relationship between personal experience theory and research Lowe argues for a pedagogy of suffering that shows how the moral anguish implicit in suffering is an ethical response of the emergent self This is an important read for all those interested in medical humanities health professional education person centred care and the sociology of health and illness     *Feminist Perspectives on Addictions* Nan Van Den Bergh,1991
