Treanor,2020-02-26 Child poverty is rising across affluent Western societies how it is measured is vital to how governments act to prevent alleviate or eliminate it While the roots of childhood poverty are fiercely debated and contested they are all too often misrepresented in policy and media discourses Seeking to redress this problem Treanor places children s experiences needs and concerns at the centre of this critical examination of the contemporary policies and political discourses surrounding poverty in childhood She examines a broad range of structural institutional and ideological factors common across developed nations and their impacts to interrogate how poverty in childhood is conceptualised and operationalised in policy and to forge a radical pathway for an alternative future *The Personal Distribution of Income in an International Perspective* Richard Hauser,2000 The book examines the development and the dynamics of the personal distribution of income in Germany Great Britain Sweden and the United States and some other OECD countries Starting with the distribution of labour income the issue is then expanded to include all monetary incomes of private households and to adjust for household size by an equivalence scale Some authors analyse one country in detail by decomposing aggregate inequality measures other authors focus on direct comparisons of some features of the income distribution in Germany with those in Great Britain or in the United States The results suggest dominant influences of unemployment as well as of tax and transfer policies and different welfare regimes respectively but also show that our knowledge about distributional processes is still limited *Causes and Consequences of Income Inequality* Ms.Era Dabla-Norris,Ms.Kalpana Kochhar,Mrs.Nujin Suphaphiphat,Mr.Frantisek Ricka,Ms.Evridiki Tsounta,2015-06-15 This paper analyzes the extent of income inequality from a global perspective its drivers and what to do about it The drivers of inequality vary widely amongst countries with some

common drivers being the skill premium associated with technical change and globalization weakening protection for labor and lack of financial inclusion in developing countries We find that increasing the income share of the poor and the middle class actually increases growth while a rising income share of the top 20 percent results in lower growth that is when the rich get richer benefits do not trickle down This suggests that policies need to be country specific but should focus on raising the income share of the poor and ensuring there is no hollowing out of the middle class To tackle inequality financial inclusion is imperative in emerging and developing countries while in advanced economies policies should focus on raising human capital and skills and making tax systems more progressive
