With the rise of Spanish language media around the world, *The Handbook of Spanish Language Media* fills the need for a comprehensive reference work, not only providing background knowledge of the various issues and topics relevant to Spanish language media but also establishing directions for future research in this rapidly growing area. **Perspectives on Marketing** Jason I. Miletsky, Michael Hand, 2009. Marketing is not an exact science and marketing issues are often interpreted, defined and approached differently by different people, creating the potential for a disconnect in communication. This is particularly true of the client agency relationship which oftentimes looks at a single marketing issue in radically different ways. *Perspectives on Marketing* is a unique spin on the subject, giving both the agency side (Jason Miletsky, CEO PFS Marketwyse) and the client side (Mike Hand, Director of Sports Marketing Hershey's) a number of topics that deal with marketing and the client agency relationship. It examines over 100 compelling and important marketing issues that marketers deal with on a regular basis, such as how to best measure ROI, how to determine the best means for reaching an audience and how to craft the most effective message. Each topic is approached from both points of view in a conversational point-counterpoint style. This unique approach provides a frank, insightful and enjoyable look into the whole of the marketing process and helps promote understanding between the marketer and the client. Philippine Mass Media in Perspective Gloria Feliciano, Crispulo J. Iban, 1967. Community Media in the Information Age Nick Jankowski, Ole Prehn, 2002. Small scale electronic media, local radio and television stations have experienced much turbulence and change in the 1990s. In western Europe, local and regional stations have achieved legitimation in national media policies; in central and eastern Europe, stations have been emerging at an explosive rate and elsewhere in the world, developments have been no less substantial. These changes taken as a whole, signal substantial albeit diverse forms of engagement and utilization of small scale electronic media. These developments have been recorded in only a handful of academic studies. No scholarly consideration of these media developments has appeared despite the range of development and widespread acknowledgement of their place in the media landscape. This volume is intended to fill this void through an integrated series of contributions emphasizing theoretical perspectives, empirical research findings and developments regarding policy and practice. It reflects the state of scholarly work in this niche of the media landscape and
