Hird, 2024-11-29 Consuming the Environment explores the environmental impacts of consuming everyday products and explains how we can consume more sustainably Written in an accessible style this book begins with our everyday mundane experiences of consuming products online in the grocery store at the mall and shows how these practices are connected to a global system dependent upon ever increasing consumption Drawing on the expertise of researchers in topics such as energy food water land fashion electronics eco tourism green products and micro plastics this volume unpacks the complex and largely invisible relationships that consumerism has with resource extraction and manufacturing By focusing on a diverse range of everyday consumer products as well as more subtle things that have been transformed into products such as knowledge waste and pets the chapters are structured around the central argument that we must re orient ourselves as citizens rather than consumers It is as citizens that we may help to organize our communities and hold our governments and industry accountable to planetary sustainability boundaries With the inclusion of summary boxes directed discussion assignment questions and further reading in each chapter this book will be an essential resource for undergraduate and postgraduate students studying courses on consumerism sustainable consumption and environmental sociology
