## Personal Qualities And College Admissions:

Personal Qualities and College Admissions Warren W. Willingham, Hunter M. Breland, Philip A. Griswold, Shula Minsky, 1982     The Power of Privilege Joseph A. Soares, 2007 An examination of why acceptance into America's most prestigious colleges remains beyond the reach of most students except those from high income professional families     *The Making of the Modern University* Julie A. Reuben, 1996-09-15 Based on extensive research at eight universities Harvard Yale Columbia Johns Hopkins Chicago Stanford Michigan and California at Berkeley Reuben examines the aims of university reformers in the context of nineteenth century ideas about truth She argues that these educators tried to apply new scientific standards to moral education but that their modernization efforts ultimately failed     **A Heavenly College Education on an Earthly Budget** Lee Martinson, 2008-12 Don't pay an arm and a leg through the nose for a lousy college degree This 2 in 1 book has what you need to do to gain admission to a Heavenly Education college and win scholarships Serious advice sprinkled with humor Inside you'll discover Book One Get an education of worth and pay less Why a college degree may be a financial disaster unless done right 10 Financial Aid planning things to do immediately Proven methods that will guarantee you free money for college How to find a college that'll set your brain on fire a college free of drugs and violence where you'll love learning Book Two Strategies for college admission and winning scholarships Why some straight A students are rejected Avoid stink bomb essay themes Write drop dead gorgeous essays Use a resume as a secret weapon Uniqueness and how to have it     **Success in College** Warren W. Willingham, 1985 The relationship among preadmission characteristics of students admission policies and different measures of success during college was studied at nine colleges Bucknell University Colgate University Hartwick College Kalamazoo College Kenyon College Occidental College Ohio Wesleyan University University of Richmond and Williams College An overview is provided of the first phase of the study which focused on the effect of personal qualities on admissions decisions for about 25 000 applicants to the nine colleges For the 4 814 students who subsequently enrolled the effect of personal qualities on college success was assessed in the second study phase After describing some prototype studies on success in college the question of how to measure success in college is addressed Information is provided on the students accumulated record of achievement over 4 years including yearly grade point averages and attainment measures scholarship leadership and significant accomplishments Consideration is given to the prediction of yearly grades and the question of whether nonacademic preadmissions information was helpful in predicting college success The students view of success and practical implications of the findings are also discussed along with a proposed recruitment strategy The questionnaire is appended SW     *Are You Smart Enough?* Alexander W. Astin, 2023-07-03 This book explores the many ways in which the obsession with being smart distorts the life of a typical college or university and how this obsession leads to a higher education that shortchanges the majority of students and by extension our society's need for an educated population The author calls on his colleagues in higher education to return the

focus to the true mission of developing the potential of each student However smart they are when they get to college both the student and the college should be able to show what they learned while there Unfortunately colleges and universities have embraced two very narrow definitions of smartness the course grade and especially the standardized test A large body of research shows that it will be very difficult for colleges to fulfill their stated mission unless they substantially broaden their conception to include student qualities such as leadership social responsibility honesty empathy and citizenship Specifically the book grapples with issues such as the following Why America s 3 000 plus colleges and universities have evolved into a hierarchical pecking order where institutions compete with each other to recruit smart students and where a handful of elite institutions at the top of the pecking order enroll the smartest students Why higher education favors its smartest students to the point where the not so smart students get second class treatment Why so many colleges find it difficult to make good on their commitment to affirmative action and equality of opportunity Why college faculties tend to value being smart more than developing students smartness i e teaching and learning
