Personality Assessment In Organizations:

Personality Assessment in Organizations H. John Bernardin, 1985-01-01 Surveys indicate that over 50% of all hiring and promotion decisions in industry involve an assessment of a candidate's personality. This is the first volume to bring together and integrate the vast research literature on the use of personality measurement. Included in the work are important contributions from the foremost researchers and theoreticians on the subject. Influenced by the conclusions of the National Academy of Sciences study on the usefulness of cognitive ability tests in industry, the essays reflect the switch in emphasis from the can-do of prediction to the will-do as measured by personality interest and motivational variables. **Personality**

Assessment in Organizations H. John Bernardin, David A. Bownas, 1985 Importance of Personality Tests at the Workplace Caroline Mutuku, 2018-07-03 Essay from the year 2018 in the subject Business Economics Business Management Corporate Governance grade 14 language English abstract Personality tests or assessments have been noted to be a strong predictor of job performance and in some cases they play significant roles in job interviews. Furthermore, they can exhibit limited potential for adverse effects compared to cognitive ability tests. As a result, it is noteworthy noticing that the use of personality tests by organizations for personnel selection has become increasingly popular among different organizations. Indeed, a significant percentage of surveyed organizations according to recent research have been confirmed to be either using or considering the use of personality tests for executive selection as well as development. Suitable validated personality tests remain to be attractive tools of selection since they aid in providing a data-based and non-subjective method that is used in the identification of high potential workers who are capable of adapting to a certain work environment. However, although the term personality test is used generically, some of the personality tests are not suitable for personnel selection. The suitable personality tests for selection purposes are the ones measuring traits while measures of psychological type should not be used. Thus, this essay aims at critically analyzing the importance of personality tests in the workplace. Personnel Selection and Assessment Heinz Schuler, James L. Farr, Mike Smith, 2013-03-07 The impetus for this volume came from the editors belief that most current research and thinking about personnel selection and assessment in organizations considered only the perspective of the employer The job applicant seeking to join the organization or the employee being considered for promotion or reassignment was typically given little attention from the designers of employment or assessment systems They believed that this imbalance had several negative implications 1 Organizational selection and assessment appeared to be the principal area within work and organizational psychology that had forgotten a basic tenet of the profession of psychology namely that the welfare of the individual is paramount 2 A lack of concern for the individuals who were being assessed could result in additional criticisms of psychological assessment in employment settings 3 The acceptability of selection and assessment devices and systems may impact in largely unknown ways on the decisions of individuals to apply for jobs or transfers thus affecting the selection ratio and potential utility of such systems 4 Individual reactions to the characteristics of assessment and selection devices could affect the accuracy of

the information obtained about those individuals adversely affecting the reliability and validity of resulting personnel decisions Informally discussing these concerns with their professional colleagues the editors found that others were similarly troubled Their next response was to organize a three day conference bringing together a number of researchers in applied psychology to present papers and participate in discussions related to balancing individual and organizational needs in selection and assessment Revisions of the papers presented at this conference form the core of this volume

Personality Testing (How Organizations Are Probing the Inner You) Paul Love,2017-09-05 Personality tests provide nothing more than a general guideline in analyzing a potential employee Be aware that there s no hard evidence that personality tests are accurate measures of an individual s personality People are a combination of character traits some stronger some weaker and which traits show up the strongest can vary with the situation Trying to categorize a person according to a given set of personality indicators may or may not give a true picture of the individual Plus you might get considerably different results giving a prospect the same test a second time Dependence on personality tests can be so misleading that some firms that develop tests such as Myers Briggs advise that using the their test for hiring purposes may even be unethical People of varying personalities may all do well at a given job for different reasons Personality may not accurately reflect or correspond to the ability to successfully fill a specific job opening For example the late Steve Jobs exhibited a tendency toward introversion not the best characteristic for a salesperson But he was extremely successful presenting his ideas to the public Even the term personality test is misleading A better term is personality assessment since test implies that there are right or wrong answers When you re dealing with people s personalities there aren t right or wrong answers just tendencies of one type or another However when a personality assessment is used to evaluate job applicants there may well be certain answers that give you a better chance at being hired When you re being tested for a specific position your potential employer may be looking for people whose profile tends to fit those particular job requirements and the company culture So should you be worried about the prospect of taking a personality assessment as part of applying for a job Worried may be too strong a term but it could be to your advantage to know a little bit about personality testing ahead of time *The Current State of Business Disciplines: Management, II* Shri Bhagwan Dahiya,2000
