**Sozialisationstheorie interdisziplinär** Dieter Geulen, Hermann Veith, 2004 Die Diskussion ber Sozialisation ist ungebrochen aktuell Die einschl gige Literatur boomt und das Paradigma erscheint erkl rungskr ftig bereinstimmend wird der Sozialisationsbegriff zur Bezeichnung der Epigenese menschlicher Subjekte in ihrer komplexen Interaktion mit den materiellen sozialen und kulturellen Bedingungen der jeweiligen gesellschaftlichen Umwelt verwendet Gleichwohl gibt es Auffassungsdifferenzen hinsichtlich der Begrifflichkeit und Methodologie Kl rungsbed rftig ist noch immer was genau sich an der Schnittstelle von Subjekt und Umwelt abspielt welche psychogenetischen Faktoren und Dynamiken und welche gesellschaftlichen Bedingungen dabei wirksam sind Bisher vorliegende Forschungsarbeiten sind meist disziplin r begrenzt

und lassen einen genuin interdisziplinären Ansatz oder eine entsprechende Kooperation vermissen. Dies ist die Ausgangsproblematik des vorliegenden Bandes. In ihm sind unter dem programmatischen Titel Sozialisationstheorie interdisziplinäre Beiträge bestens ausgewiesener Autoren versammelt, die sowohl die Aktualität dieser Forschungsperspektive dokumentieren als auch die Vielfalt der für das Thema relevanten Probleme und Fragestellungen reflektieren. Auf diese Weise wird deutlich, wie breit das Thema gefächert ist, aber auch, dass wir von einer bergreifenden integrierenden Theorie der Sozialisation noch weit entfernt sind.

Rocío Fernández Ballesteros, 2007. In this outstanding book leading experts from throughout Europe provide a fascinating overview of the most important psychological research into aging with special emphasis on training and professional issues as well as science. In terms of its population, Europe is the oldest continent in the world, thus placing European research into the effects and implications of an aging population in a unique position. As this book shows, the aging of the population should be considered a positive phenomenon that reflects sociopolitical, educational, biomedical, and psychological development. The real threat for our population is not aging but disability, and the challenge for the 21st century is to reduce dependency and disability and thus improve well-being and quality of life rather than increasing life expectancy. The recent United Nations 2nd International Plan of Action on Aging and its Research Agenda on Aging for the 21st Century, as well as policies of the European Federation of Psychologists' Associations, tell us that psychology and psychologists will play an essential part in meeting this challenge. This book shows how.
