Personality Hardcover By Pervin Lawrence A:

Handbook of Personality Oliver P. John, Richard W. Robins, Lawrence A. Pervin, 2010-11-24 This authoritative handbook is the reference of choice for researchers and students of personality. Leading authorities describe the most important theoretical approaches in personality and review the state of the science in five broad content areas: biological bases, development, self and social processes, cognitive and motivational processes, and emotion adjustment and health. Within each area, chapters present innovative ideas, findings, research designs, and measurement approaches. Areas of integration and consensus are discussed, as are key questions and controversies still facing the field. *Handbook of Personality, Third Edition* Oliver P. John, Richard W. Robins, Lawrence A. Pervin, 2008-08-05 This authoritative handbook is the reference of choice for researchers and students of personality. Leading authorities describe the most important theoretical approaches in personality and review the state of the science in five broad content areas: biological bases, development, self and social processes, cognitive and motivational processes, and emotion adjustment and health. Within each area, chapters present innovative ideas, findings, research designs, and measurement approaches. Areas of integration and consensus are discussed, as are key questions and controversies still facing the field.

National Library of Medicine Current Catalog National Library of Medicine (U.S.), *Recording for the Blind & Dyslexic, ... Catalog of Books*, 1996 **Emotion, Personality and Cultural Aspects in Crowds** Rodolfo Migon Favaretto, Soraia Raupp Musse, Angelo Brandelli Costa, 2019-08-29 This practically focused book presents a computational model for detection and analysis of pedestrian features in crowds from video sequences. The study of human behavior is a subject of great scientific interest and probably an inexhaustible source of research. The analysis of pedestrians and groups in crowds is relevant in several areas of application such as security, entertainment, environmental and public spaces planning, and social sciences. Cultural and personality aspects are attributes that can influence personal behavior and affect the group in which individuals belong. In this sense, we consider different ways of characterizing individuals and groups in crowds with respect to their relationship with the geometrical space and time. We discuss and describe an approach to extract and analyse from the Computer Science point of view emotions, personalities, and cultural aspects from crowds and groups of pedestrians using Computer Vision techniques. Extracting characteristics from real pedestrians and crowds benefits other areas such as architecture and design, planning spaces to maximize pedestrian and group environment fit, security and surveillance design of evacuation plans considering characteristics of the crowds, and detection of abnormal events. Entertainment: more realistic crowds in movies and games reproducing characteristics from real pedestrians and crowds. Social sciences: understanding of human behavior among others. A big challenge in this area of research is the comparison with real life data. In this book, we successfully compared the results of the proposed approach with Psychology literature where several studies aimed to analyse human behavior.
