## **Personality Projection In The Drawing Of The Human Figure:**

**Personality Projection in the Drawing of the Human Figure** Karen Alper Machover, 1949 In this book the writer will make an effort to outline a method of personality analysis based upon the interpretation of drawings of the human figure That individuals reveal important aspects of their personality in drawing has long been recognized What has been lacking and I trust that the work that is now being done in drawing analysis will supply is a degree of systematization of analysis of the graphic product which is at once comprehensive communicable and does justice to the intricacies of personality Book PsycINFO Database Record c 2006 APA all rights reserved

Machover, 1974 **Children's Drawings** Martin Krampen, 2013-06-29 This book is dedicated to all those who love children and their wonderful often surprising drawings This means it addresses all those interested in their developing capacity to produce iconic signs parents teachers child psychologists artists architects since building drawings are treated here and semioticians at large to name but a few potential readers Because of the broad audience I tried to keep scientific jargon to a minimum Whenever this was unavoidable I tried to explain the terms in such a way that even beginners in psychology could understand my arguments I received the first impulse to think about a book like this from the International Year of the Child declared by the UN in 1979 In a first phase of the project I obtained drawings of the six different building types treated in this book from more than 100 children aged 3-12 years in Turkey during a stay there as part of the faculty of Architecture of the Karadeniz Technical University in Trabzon under the auspices of the UN ESCO UNDP program TUR 75 012 My special thanks go to Dr Erdem Aksoy then president of the university and Dr Ozgontil Aksoy then dean of the faculty of Architecture

and Civil Engineering for their encouragement to carry out the project I would also like to thank Dr Kutzal Oztirk Sevinc Ertirk Ali Ozbilen Hasan Saltik together with all the teachers in nursery and elementary schools in and around Trabzon who helped to collect the drawings

**Interpreting Projective Drawings** Marvin Leibowitz,2013-06-17 The use of drawings to discover emotions attitudes and personality traits not verbally stated by a client is a valuable and widely used technique in psychoanalysis and psychotherapy In this book the author offers a highly practical introduction to the use and interpretation of projective drawings Grounding his approach in self psychology Dr Leibowitz provides detailed information on how to interpret house tree man woman and animal drawings By pairing clinical case examples with general interpretation guidelines the book offers a thorough examination of projective drawings making it a valuable text for beginners and an important reference source for the seasoned clinician Interpreting Projective Drawings contains an impressive array of drawings with over 175 total illustrations Almost half of these drawings are from comprehensive case studies that follow adult patients from the beginning phase of treatment to their one year or more status These include over 30 chromatic illustrations that clearly demonstrate the importance of color in projective drawing interpretation In addition to detailed information on how to interpret these five types of achromatic and chromatic drawings the book also contains an appendix that offers examiner instructions instructions for self administration and adjective lists to aid in interpretation Together these components make Interpreting Projective Drawings an essential resource for any mental health professional interested in using drawings to their fullest effect in their practice

**Early Development of Body Representations** Virginia Slaughter,Celia A.

Brownell,2011-10-20 Because we engage with the world and each other through our bodies and bodily movements being able to represent one s own and others bodies is fundamental to human perception cognition and behaviour This edited book brings together for the first time developmental perspectives on the growth of body knowledge in infancy and early childhood and how it intersects with other aspects of perception and cognition The book is organised into three sections addressing the bodily self the bodies of others and integrating self and other Topics include perception and representation of the human form infant imitation understanding biological motion self representation intention understanding action production and perception and children s human figure drawings Each section includes chapters from leading international scholars drawn together by an expert commentary that highlights open questions and directions for future research

**Kinderzeichnungen - eine entwicklungspsychologische untersuchun...** Sylvia A. Schetty,1974 **Human Figure Drawings in Adolescence** Mollie S. Schildkrout,I. Ronald Shenker,Marsha Sonnenblick,1972 **Personality Projection in the Human Figure Drawing** Murray Kent Teris,1950 *Children Draw And Tell* Marvin Klepsch,Laura Logie,2014-05-22 First published in 1988 Child therapists have long been fascinated by children s human figure drawings and what they reveal about self image feelings and family relation ships Now this comprehensively researched volume

provides a valuable introduction to using children's human figure drawings as projective measures in a variety of settings. The principles for interpreting drawings as well as general and specific indicators are illustrated in 85 children's drawings. Part I on The Theory deals with the background of projective psychology discussing art as a projective technique and emphasizing that all behavior including drawings reflects personality attitudes and values. The authors examine the major methods of obtaining diagnostic information and recommend the use of several methods for best results. Part II on The Application examines in detail the projective use of children's human figure drawings to evaluate personality relationships particularly in families group values and attitudes. In each area research is presented directions for administration of various tests are given and guidelines for interpretation are offered. Significant factors are revealed in numerous children's drawings accompanied by clinical comments. Of special interest is the presentation of original research on group values among Canadian Indian Saskatchewan Cree children and on attitudes of young children toward teachers doctors and other authority figures as revealed in human figure drawings. For psychologists social workers teachers and other child care professionals as well as students in these fields this is an indispensable basic guide to interpreting human figure drawings.

**L'élaboration mentale** Raphaelle Miljkovitch, Caroline Beauvais, 2021-11-23. L'élaboration mentale ou psychique est un concept clef en psychologie psychiatrie et psychothérapie. Elle est considérée comme essentielle à la régulation des affects elle-même indispensable au bon développement de la personne. L'élaboration serait de même au cœur du processus thérapeutique en permettant une réduction de l'anxiété et du passage à l'acte pathologique. Introduite initialement en psychanalyse comme le moyen par lequel l'énergie pulsionnelle est transformée ou reliée des représentations le terme est aujourd'hui utilisé de manière courante par les différents courants psychologiques. Les progrès scientifiques dans diverses disciplines permettent aussi d'avoir une meilleure définition des mécanismes en jeu et il paraît important de mieux définir ce concept et ce qui sous-tend le développement psychologique de l'individu. Bien que cette notion soit ancienne et couramment utilisée les questions restent nombreuses par exemple suppose-t-elle des capacités cognitives minimales? Est-elle possible un géoprécocité? Nécessite-t-elle le langage verbal? Comment un défaut d'élaboration s'articule-t-il aux différents troubles mentaux et somatiques? Quels sont les mécanismes en œuvre dans le travail thérapeutique? Ce livre qui est le premier ouvrage complet sur le sujet a pour ambition de répondre à ces différentes questions en réunissant des experts en psychanalyse psychologie du développement psychologie cognitive neurosciences psychiatrie ergothérapie linguistique modélisation informatique philosophie etc. Il s'adresse aussi bien aux psychiatres psychologues et psychothérapeutes en exercice qu'aux étudiants dans ces disciplines.
