The Whole Person Mark H. Bickhard, 2024-11-27

The Whole Person explores the realms of theory and philosophy concerning minds and persons. This book presents models of the emergent realization of multiple mental processes and of the constitution of social realities and social persons. Each chapter explores prevalent theoretical and philosophical assumptions that obstruct the acceptance of models depicting emergent realization, offering analyses of these barriers and demonstrating ways to overcome them. Rooted in the framework of process metaphysics, this book models metaphysically genuine emergence, paving the way for a comprehensive model of multifarious normative emergences. These normative emergences include phenomena such as function/dysfunction, representational truth and falsity, rational/irrational, ethical/unethical, and others that shape our mental and social landscapes. The discussion extends to the macro evolutionary culmination of mental processes in a model of reflective consciousness. The book then extends its exploration to the foundational role of mental processes in the emergence of social realities and persons, with language acting as a core element in these emergences. Addressing evolutionary aspects, brain processes, developmental processes, moral normativities, and self-consistency considerations, The Whole Person presents a holistic integration of decades of constructive work. Endorsements: This ambitious yet unpretentious, carefully constructed and argued book is a must-read for anyone with serious interest in the nature of persons and the psychology of personhood. Mark Bickhard's The Whole Person is a sustained and convincing narrative about our individual and collective evolution and emergence as the unique beings that we are. Of particular interest is his account of the emergence of persons as *homo socius*. Here Professor Bickhard captures key but often overlooked historical, sociocultural, and socio-developmental dynamics and processes that make us who we are, a species constantly

interacting with each other and the world in a never ending process of mutual co constitution By theorizing a process metaphysics replete with emergent normativity that does not clash with a naturalistic ontological psychology Bickhard takes a giant step toward seeing ourselves as we are and as we might become Jack Martin Professor Emeritus Simon Fraser University A typical psychological theory offers narrow generalizations about data sets obtained by semi proprietary empirical methods The basic empirical research on which such theories have depended is in crisis tremendous effort has gone into ill motivated studies applying statistics inappropriately to inadequate samples too often generating irreproducible results The kind of theory that psychology needs is broad and deep pays no respect to boundaries between specialties makes falsifiable predictions and answers to arguments in principle The Whole Person presents just such a theory psychologists whether their aim is to extend it and support it or to challenge it and refute it will benefit from studying it closely Robert L Campbell Professor Emeritus Psychology Clemson University **The Hundred Greatest Men: Philosophy** ,1880 The new calendar of great men, biographies of the 558 worthies in the Positivist calendar of A.
