Perspectives on Distributive Justice Wulf Gaertner, Marlies Klemisch-Ahlert, 2013-06-29 It is probably fair to say that there does not exist a unique and generally accepted notion of justice. Even if one confines oneself to economic justice, one can still get many answers to the question of how justice henceforth we shall use the term distributive justice should be defined and characterized. This may be disappointing for the outside observer, but one can also view this as a challenge at least as long as one thinks that distributive justice is an issue economics should be concerned with. Many problems of distributive justice can be described as follows: There is a fixed collection of well-defined objects, usually commodities, which are quantitatively measurable and perfectly divisible. This collection is to be divided up among a certain number of individuals, the members of society. Let's say: According to which principles or rules should this distribution be carried out? Should people be rewarded according to their ability or according to their needs? Should the distribution be such that nobody envies the bundle of any other member of society? Should the collection of entities be distributed in a way that yields the greatest benefit? *Library of Congress Catalog* Library of Congress, 1974-04 A cumulative list of works represented by Library of Congress printed cards

The Artful Economist Ilde Rizzo, Ruth Towse, 2016-10-04 This book reassesses central topics in cultural economics: Public finance and public choice theory as the basis for decision making in cultural and media policy; the role of welfare economics in cultural policy; the economics of creative industries; the application of empirical testing to the performing arts; and the economics of cultural heritage. Cultural economics has made enormous progress over the last 50 years, to which Alan Peacock made an important contribution. The volume brings together many of the senior figures whose contributions to the various special fields of cultural economics have been instrumental in the development of the subject and others reflecting on the subject's progress and assessing its future direction. Alan Peacock has been one of the leading lights of cultural economics, and in this volume Ilde Rizzo and Ruth Towse and the other contributors ably capture the import of his contributions in a broader context of political economy. In doing so, they offer an overview of progress in cultural economics over the last forty years. Tyler Cowen, Professor of Economics and Director of the Mercatus Center, George Mason University, Fairfax, Virginia, USA: A fitting tribute to Professor Sir Alan Peacock's inspiring intellect, leadership, and his outstandingly rich and varied legacy in the domain of cultural economics. This book draws together illuminating analyses and insights from leading cultural economists about the role and value of this dynamic and increasingly policy-relevant field of enquiry. Gillian Doyle, Professor of Media Economics and Director of Centre for Cultural Policy Research, University of Glasgow, UK *A New Education for a New Economy: From Human Capital to Human Flourishing* Tal Gilead, 2024-06-03 Providing an in-depth, novel analysis of education's role in today's economy by scrutinizing its theoretical underpinnings, this volume critiques the suitability of the current dominant economic framework for education and for shaping educational policymaking worldwide. Critically examining the history and philosophy that underpin our present societal understanding of the link between economics and

education the book argues for an urgent redefining of education's role in the economy based on intellectual foundations that significantly differ from our current dominant conceptions Across seven chapters the book posits that the adoption of a new philosophical framework the reshaping of economic and educational aims and the adjustment of our educational system are each necessary to better promote human flourishing Ultimately providing a platform to entirely reconsider the idea that the primary aim of education is to serve the economic system in particular economic growth this book will appeal to scholars researchers and postgraduate students studying educational policy the philosophy of education and the history of education more broadly Education policymakers and academics studying education and the economy may also find this book of interest

The Journal of Economic Perspectives ,2004 This journal attempts to fill a gap between the general interest press and other academic economics journals Its articles relate to active lines of economics research economic analysis of public policy issues state of the art economic thinking and directions for future research It also aims to provide material for classroom use and to address issues relating to the economics profession
