## **Perspectives On Arabic Linguistics Vii Papers From The Seventh Annual:**

**Perspectives on Arabic Linguistics** Mushira Eid, 1995-06-22 This volume includes ten papers selected from the Seventh Annual Symposium on Arabic Linguistics For the first time in this series three of the papers represent experimental studies dealing with Arabic syllable and morphological structure Four are focused on aspects of agreement in Arabic The remaining three deal with certain problems in Arabic phonology and discourse     **The "Broken" Plural Problem in Arabic and Comparative Semitic** Robert R. Ratcliffe, 1998-12-15 The formal aspects of non concatenative morphology have received considerable attention in recent years but the diachronic dimensions of such systems have been little explored The current work applies a modern methodological and theoretical framework to a classic problem in Arabic and Semitic historical linguistics the highly allomorphic system of stem internal or broken plurals It shows that widely accepted views regarding the historical development of this system are untenable and offers a new hypothesis The first chapter lays out a methodology for comparative historical research in morphology The next two chapters present an analysis of Arabic morphology based on contemporary formal linguistic approaches and applies this analysis to the noun plural system Chapter Four shows that neither semantic shift nor ablaut type sound change account adequately for the data The fifth chapter offers a systematic comparison of the plural systems of Semitic languages incorporating much new research on the languages of South Arabia and Ethiopia Chapter Six proposes a new reconstruction     **Perspectives on Arabic Linguistics**, 2002 The papers in this volume cover many aspects of Arabic linguistic research from investigations of the acquisition of phonetic detail to the borrowing of discourse patterns the use of secret languages and models of language acquisition     **Whose German?** Orrin W. Robinson, 2001 The author addresses a number of issues in German and general phonology using a specific problem in German phonology the ach ich alternation as a springboard These issues include especially the naturalness or lack thereof of the prescriptive standard in German and the importance of colloquial pronunciations as well as historical and dialect evidence for phonological analyses of the standard language Other important topics include the phonetic and phonological status of German r the phonetic and phonological representation of palatals the status of loanwords in phonological description and especially as regards the latter the usefulness of Optimality Theory in capturing phonological facts The book addresses itself to scholars from the fields of German and Germanic linguistics as well as those concerned more generally with theoretical phonology whether Lexical or Optimal It may even appeal to the ortho pists and lexicographers of modern German     Textual Parameters in Older Languages Susan C. Herring, Pieter Th. van Reenen, Lene Schøsler, 2000-01-01 Textual Parameters in Older Languages takes a contemporary approach to the inherent limitations of using older texts as data for linguistic analysis drawing on methods of text analysis pragmatics and sociolinguistics to supplement traditional historical and philological methods The focus of the book is on the importance of controlling for textual parameters defined by the editors as dimensions of variation associated with texts and their production including text

type degree of poeticality orality and dialect in the analysis of older language data Failure to do so can result in invalid generalizations recognizing the influence of textual parameters conversely raises a myriad of issues for the practice and theory of historical linguistics The 12 essays in this collection apply this approach in analyses of anaphora non finite verbal forms particles punctuation word order and other phenomena in a wide range of languages including Ancient Tamil Sanskrit Latin Heian Japanese Medieval Greek Old French Old Russian Middle English and Modern Danish An in depth introduction by the editors lays out the goals of the textual parameters approach and considers the methodological and theoretical consequences of the evidence presented in the book as a whole

**The Lexical Basis of Grammatical Borrowing** Ruth Elizabeth King, 2000 This book is a detailed study of French English linguistic borrowing in Prince Edward Island Canada which argues for the centrality of lexical innovation to grammatical change Chapters 1-4 present the theoretical and methodological perspectives adopted along with the sociolinguistic history of Acadian French Chapter 5 outlines the basic features of Acadian French morphosyntax Chapter 6 provides an overview of the linguistic consequences of language contact in Prince Edward Island Chapters 7-9 consider three particular cases of grammatical borrowing the borrowing of the English adverb back and the semantic and syntactic reanalysis it has undergone the borrowing of a wide range of English prepositions resulting in dramatic changes in the syntactic behaviour of French prepositions and the borrowing of English wh ever words resulting in the emergence of a new type of free relative Chapter 10 argues for a theory of grammar contact by which contact induced grammatical change is mediated by the lexicon

*On Subject and Theme* Ruqaiya Hasan, Peter H. Fries, 1995-11-23 The ten papers in this volume focus on Subject and Theme Theme began its life as a semantic notion in the work of Vil m Mathesius while Subject has traditionally been seen as just a syntactic entity More recently two related perspectives on these concepts have attracted linguists attention the formal criteria for their recognition and the relations between the two concepts Using the systemic functional model as their point of departure the papers in the present volume consider the two notions in a wider context by relating them to the interpersonal and textual metafunctions of language By contrast with the current linguistic approaches the primary focus here is neither simply on formal recognition criteria nor on the relation of these elements to each other instead the notions of Subject and Theme are examined from the point of view of their function in the economy of discourse with studies of their significance in English and French as well as in a range of non Indo European languages Definitions of the concepts are offered on the basis of their discourse functions which are also important in selecting the formal recognition criteria and in understanding their mutually supportive role vis vis each other Most of the papers in the volume are a selection from presentations made at the 19th International Systemic Functional Congress at Macquarie University

**Language and Ideology** René Dirven, Bruce Wayne Hawkins, Roslyn M. Frank, Esra Sandikcioglu, Cornelia Ilie, 2001-01-01 Together with its sister volume on Theoretical Cognitive Approaches this volume explores the contribution which cognitive linguistics can make to the identification and analysis of overt and hidden

ideologies This volume shows that descriptive tools which cognitive linguistics developed for the analysis of language in use are highly efficient for the analysis of ideologies as well Amongst them are the concept of grounding and the speaker's deictic centre iconographic reference frames cultural cognitive models as a subgroup of Idealized Cognitive Models conceptual metaphors root metaphors frames as groups of metaphors mental spaces and conceptual blending The first section Political metaphor and ideology discusses topics such as Nazi Germany discrimination of Afro Americans South Africa's rainbow nation and the impeachment campaign against President Clinton The second section on cross cultural Otherness deals with cultural clashes such as those between the Basque symbolic world and the general European value systems between the Islam and the West determining its treatment of Iraq in the Gulf War and between Hong Kong Otherness and centuries of Western dominance The third section deals with Metaphors for institutional ideologies and concentrates on the globalisation of the North and South American markets on insults in unparliamentary debates and on the Internet being for sale

Morphological Analysis in Comparison Wolfgang U. Dressler, 2000-01-01 This volume consists of selected and revised papers from the Seventh International Morphology Meeting held in 1996 in Vienna It presents advances in morphological theorizing such as the foundations of sign based morphology the morphology syntax interface the boundaries between compounding and derivation derivation and inflection and the emergence of morphology from premorphological precursors in early first language acquisition The contributions deal with morphological analyses in various fields of the ever widening domain of morphology and its relevance to the lexicon The comparative aspect is reflected in the above mentioned areas and through the variety of languages investigated Indo European and non Indo European languages of Europe and Asian African and American languages This breadth allows valuable insights into current problems of morphological research in America Western and Eastern Europe *Bibliographie Linguistique de L'annee 1999* Mark Janse, Hella Olbertz, Sijmen

Tol, 2003-11-30 Setting out the historical national and religious characteristics of the Italians as they impact on the integration within the European Union this study makes note of the two characteristics that have an adverse effect on Italian national identity cleavages between north and south and the dominant role of family It discusses how for Italians family loyalty is stronger than any other allegiance including feelings towards their country their nation or the EU Due to such subnational allegiances and values this book notes that Italian civic society is weaker and engagement at the grass roots is less robust than one finds in other democracies leaving politics in Italy largely in the hands of political parties The work concludes by noting that EU membership however provides no magic bullet for Italy it cannot change internal cleavages the Italian worldview and family values or the country's mafia dominated power matrix and as a result the underlying absence of fidelity to a shared polity Italian or European leave the country as ungovernable as ever **Cognition and Representation**

**in Linguistic Theory** Antoine Culioli, 1995 The objective of this book is to better acquaint English speaking linguistics with a corpus of texts hitherto untranslated containing the cognitive based research in formal linguistics of one of the most

important theoreticians in the field Antoine Culioli b 1924 Culioli s viewpoint is grounded in Emile Benveniste s 1902 1976 revolutionary answer to Saussure s opposition between competence langue and performance parole captured in the idea of nonciation in which the relationship between an individual and a language is one of appropriation The translation has been prepared to provide the reader with as obstacle free a path as one can clear to a theory that requires and indeed commands a very close attentive reading As an additional aid to understand Culioli s argument footnotes throughout the work show similarities and differences with the work of the cognitive linguist Ronald W Langacker E.F.K. Koerner Pierre Swiggers,1999 This fascicle contains the complete bibliography up to 1999 of E F Konrad Koerner the founder and director of the journal *Historiographia Linguistica* 1974 and editor of *Diachronica* and of various specialized linguistic series Koerner s scholarly work which is surveyed in the introductory Biographical notice by P Swiggers focuses on the history of linguistics in the past two centuries especially on the relationship between historical comparative grammar and various forms of general linguistics The Biographical Notice is divided into seven sections Books and Volumes edited Articles Chapters in Volumes and Minor Papers Review Articles and Reviews Miscellanea Papers read Journals edited General Editorship In the first paper that follows the bibliography Koerner presents a critical overview of linguistic historiography and outlines some prospects The second paper explores the delicate question of the role of ideological convictions in linguistics and in human sciences in general *Linguistics and Language Behavior Abstracts* ,2001 **Social Interaction and Discourse Structures** ,1997 Asian and African Studies ,1999 Towards a Social Science of Language: Variation and change in language and society Gregory R.
