Attribution Gifford Weary, Melinda A. Stanley, John H. Harvey, 2012-12-06 This book initially was conceived in 1986 by Weary and Harvey as a revision and update of their 1981 *Perspectives on Attributional Processes* published by Wm C Brown Dubuque Iowa However the extensive nature of recent work on attributional processes and the opportunity to collaborate with Melinda Stanley as a coauthor led to a plan to develop a more comprehensive work than the 1981 book It definitely is an amalgam of our interests in social and clinical psychology It represents our commitment to basic theoretical and empirical inquiry blended with the applications of ideas and methods to understanding attribution in more naturalistic settings and as it unfolds in the lives of different kinds of people coping with diverse problems of living The book represents a commitment also to the breadth of approach to attribution questions epitomized by Fritz Heider s uniquely creative mind and work in pioneering the area To us the attributional approach is not a sacrosanct school of thought on the human condition It is rather a body of ideas and findings that we find to be highly useful in our work as social JH and GW and clinical GW and MS psychology scholars It is an inviting approach that as we shall describe in the book brings together ideas and work from different fields in psychology all concerned with the pervasive and inestimable importance of interpretive activity in human experience and behavior
