than sustain our preconceptions of marginalized groups Most accounts of marginalization approach the subject from a distance and tend to overemphasize the victimization of outsiders Taking a more intimate approach this book reveals the personal moral and social implications of marginalization by drawing upon the actual experiences of such individuals Multidisciplinary and multicultural Identity on the Margin addresses marginalization at a variety of social levels and within many different social phenomena going beyond familiar cases dealing with race ethnicity and gender to examine such outsiders as renegade children conservative Christians and the physically and mentally disabled And because women are especially subject to the effects of marginalization feminist concerns and the marginalization of sexual practices provide a common denominator for many of the essays From problems posed by complimentary racism to the status of gays in Tony Blair s England from the struggle of Native Americans to preserve their identities to the singular problems of single mothers Identity on the Margin takes in a broad spectrum of cases to provide theoretical analysis and ethical criticism of the mechanisms of identity formation at the edges of society In all of the cases the authors demonstrate the need for theory that initiates social change by considering the ethical implications of marginalization and criticizing its harmful effects Bringing together accounts of marginalization from many different disciplines and perspectives this collection addresses a broad audience in the humanities and social sciences It offers a basis for enhancing our understanding of this process and for working toward meaningful social change

**Outlook** Alfred Emanuel Smith, Francis Walton, 1899 Beyond the Public/Domestic Dichotomy Janet Sharistanian, 1987-05-21 The eight essays in this volume explore the public or extra domestic lives of women examining the

connections between their activities in the public and private domains The purpose underlying this theme is twofold first to counteract the common tendency to ignore the influence of women outside of the home and second to test some generalizations about women s status and social roles which have developed from feminist scholarship Taking as a starting point the model of cultural anthropologist Michelle Z Rosaldo which suggests that asymmetry between the roles of men and women stems not from biology but from social custom the contributors go on to discuss and question various aspects of this theory
