Some Perspectives in Environmental Management Graham James Cleary, 1989

Preventive Environmental Management: An Indian Perspective Shaym R. Asolekar, R. Gopichandran, 2006-01 The link between business production commerce and environmental imperatives is becoming more and more obvious Industry the world over is under pressure like never before from an unprecedented set of environmental laws But the fact is that only a few crusaders have managed to influence policy makers and opinion makers to devise the command and control regime It became increasingly clear during the latter part of the twentieth century that current development models would not help create an appropriate milieu for progress that would maintain a desirable environment and ensure sustainable development To bridge this gap a proactive movement emerged in governing systems including industry and community This has entailed a paradigm shift in approach popularly known as PEM i e Preventive Environmental Management Implicit in this paradigm is the twining of economic and environmental benefits This book highlights the need for incorporating PEM approaches characterized by community action at all levels of implementation At the company level PEM means adopting a holistic approach that includes diagnosing processes and systems for pollution hot spots interventions to reduce wastes at source improving product quality and yield enhancing waste treatment and value addition and integrating economic and environmental concerns of the stakeholders What the book attempts is an interpretation of the present status of India s environment with special reference to municipal and industrial operations It also discusses the significance of appropriate tools and techniques that enable transition across the continuum of production consumption and environmental protection as well as the preparedness of communities to monitor improved environmental quality An expansive framework for resolving some prevailing dilemmas has also been proposed in this book

Nature, Temporality and Environmental Management Lesley Head, Katarina Saltzman, Gunhild Setten, Marie Stenseke, 2016-08-05

How are different concepts of nature and time embedded into human practices of landscape and environmental management And how can temporalities that entwine past present and future help us deal with challenges on the ground In a time of uncertainty and climate change how much can we hold onto ideals of nature rooted in a pristine and stable past The Scandinavian and Australian perspectives in this book throw fresh light on these questions and explore new possibilities and challenges in uncertain and changing landscapes of the future This book presents examples from farmers gardens and Indigenous communities among others and shows that many people and communities are already actively engaging with environmental change and uncertainty The book is structured around four themes environmental futures mobile natures

indigenous and colonial legacies heritage and management Part I includes important contributions towards contemporary environmental management debates yet the chapters in this section also show how the legacy of older landscapes forms part of the active production of future ones Part II examines the challenges of living with mobile natures as it is acknowledged that environments natures and people do not stand still An important dimension of the heritage and contemporary politics of Australia Sweden and Norway is the presence of indigenous peoples As is clear in part III the legacies of the colonial past both haunt and energise contemporary land management decisions Finally part IV demonstrates how the history and heritage of landscapes including human activities in those landscapes are entwined with contemporary environmental management The rich empirical content of the chapters exposes the diversity of meanings practices and ways of being in nature that can be derived from cultural environmental research in different disciplines The everyday engagements between people nature and temporalities provide important creative resources with which to meet future challenges **New Paths**
