Perspectives Of Fashion:

The Hidden Life of Clothing Rachel Worth, 2023 Since the democratisation of the clothing industry in the early 19th century buyers have become increasingly disconnected from the creative and human aspects of the production of clothing Arguably clothing is now valued less for its aesthetic qualities or because of the hours spent in its making but more for the extent to which it serves current fashion In a climate of increasing anxiety about the environmental and social impact of the contemporary global fashion industry Rachel Worth suggests that rather than seeking solutions only in the present looking to history can assist in understanding better the challenges consumers face today in making decisions about the contents of their wardrobes which in turn will impact on the nature of the future global fashion industry She does not seek to offer simplistic historical solutions to contemporary problems but explores ways in which it might be possible to bridge divides between knowledge of the past current individual choice and possible directions for future action The more we know about our clothes the less likely it is that we will wear an item of clothing only a few times before replenishing it with newer purchases that are on trend By taking ownership of our personal clothing choices rather than feeling pressurised to respond to sophisticated marketing and to influencers this book suggests how we might rethink our wardrobes in philosophical and practical ways in order to create a sense of order and beauty in our lives and to wrest control back from the increasing chaos of seemingly endless choice that perpetuates unsustainable impersonal and fast fashion

Men in the Mirror Tim Edwards, 2016-10-06 In recent decades the myth of fashionable women and sartorially challenged men has been overturned not least through the proliferation of men's style magazines such as GQ and the emergence of masculinity as a marketing tool In this engaging book Edwards applies a sociological approach to our understanding of men's fashion which he argues is significant in the nexus of masculinity and society past and present rather than a narrow artistic or aesthetic interest Rejecting an essentialist or natural origin Edwards explores how masculinity and men's fashion are constructed particularly in relation to consumer society It is the growing commodification and aestheticism

of everyday life alongside developments in marketing and advertising that Edwards identifies as the catalyst in the emergence of men's fashion rather than an abstract crisis of masculinity or new man identity. Concurrently in the 1980s changes in demography, economics and ideology gave certain men greater freedom and spending power than ever before. Edwards investigates how these men, clearly distinguished by age, class and sexual orientation, were seduced by advertisers with sexualised images of suited city gents and body beautiful boys in Levis, and how the resultant process of consumption was facilitated through developments in the practice of shopping itself, such as easy access to credit. He examines the influence of the advertisers' message in creating a hierarchy of masculinity in which some men are valorised and others are denigrated. Starting with a historical review of men's fashion and a discussion of its importance and meanings, Edwards goes on to analyse the contemporary marketing of menswear and masculinity in advertising and in the media, and considers the politics of fashion for men in terms of gender, class, race and sexuality.

Afterlife of Apparel Kyler Arnold, 2023.

Vital Vogue Otto Von Busch, 2018-03. What if we understood fashion as a bioelectrical energy and as a form of flirting? What if fashion is not so much about clothes but primarily a cognitive interface between living organisms hungry for connection and love? How would such a shift in perception change our approach to fashion and sustainability? The psychoanalyst, political theorist, biologist and pioneer of body therapies Wilhelm Reich framed a groundbreaking synthesis on the biosocial aspects of life. Reich never discussed fashion but, taking designerly inspiration from his work, this book argues fashion can be understood as a biological as much as social phenomenon. When fashion works at its best, we feel it in our bodies. The agency of fashion is not in the system but in your body. Fashion is the organismic pleasure and excitement of growth and expansion, an energy sparkling with life, a form of biosocial flourishing or more precisely a vital vogue. In this book, von Busch reimagines fashion as an energy, a biosocial event of mutual flirting and growth, putting focus on fashion as a biological phenomenon and thus radically challenging more traditional perspectives in fashion studies. With this shift in perspective, also new approaches to sustainable fashion become apparent that put the intensity of aliveness at the focus, beyond austerity or circular business as usual.

Dangerous Bodies Royce Mahawatte, Jacki Willson, 2023-01-11. This edited book brings together new perspectives on fashion, the body and politics. The intention of this collection is to explore the cultural intersection between bodies, fashion and transgression, often in the most unlikely of locations. Bodies are political players in culture, and the authors gathered here ask a range of pressing questions: What role do fashioned bodies play in resistance in meeting governmental boundaries or institutional power? Arguably, fashion is an aspect of modern warfare, and style can defend and attack in cultural space. So how

do fashioned bodies occupy the grey area between social control and the resistance to power This book is interdisciplinary and international with contributors situated within a broad range of disciplines including Art History and Critical Practice Cultural Studies Fashion Critical Studies Film and Literary Studies Performance Studies Politics and International Studies Sociology Gender Queer LGBTI and Critical Race Studies Engaging with Fashion Federica Carlotto, Natalie

Ekström, 2023-06-16 Fashion as a societal phenomenon has fascinated scholars in different disciplines such as history sociology anthropology psychology and marketing often from an interdisciplinary perspective Fashion mirrors societal changes cultural norms and values over time It can be interpreted as mundane everyday practices constructions of identity and status as well as being associated with the art world In this book the focus lies on marketing and the role of marketers when fashion permeates society in deliberate and subtle ways This edited collection critically reflects upon the power of fashion in contemporary society and the role marketing and marketers play in the process of defining creating and preserving fashion but also in divesting fashion that is no longer up to date It expands on existing knowledge to better understand the role marketers play as cultural agents in determining fashion and its markets Contributors to the book are international advanced scholars from a variety of disciplines such as anthropology marketing psychology and sociology who challenge traditional ways of thinking about marketing In a society where problems with overproduction and excessive consumption represent major challenges the critical perspective of the role fashion plays in contemporary society and what influence marketing has for shaping fashion are not merely relevant but necessary This cutting edge interdisciplinary book will appeal to scholars across a broad range of fields including fashion marketing fashion studies and consumer culture
