

ARCHIVAL JOURNALS:

Perspectives Gained by E-Publishing IEEE Transactions on Education

by MARION O. HAGLER, JANET C. RUTLEDGE,
WILLIAM M. MARCY, and TED E. BATCHMAN

Four years ago the IEEE began to explore ways to publish the multimedia materials that engineers found useful for activities as diverse as representing research data and learning environments. Kenneth R. Laker, then vice president for educational activities and later IEEE president, asked Marion Hagler to lead that exploration. It soon became apparent that IEEE needed a peer-reviewed publication of multimedia learning environments for engineering educators. Such a publication could give academic visibility and credibility to the creative work associated with the preparation of multimedia materials.

CD-ROMs seemed the logical medium. They provide a convenient means of preserving and distributing file content and, in contrast to file servers, require no network connection or continuing maintenance. The realization that Web browsers running on PC, Macintosh and UNIX computers could display *de facto* Web-standard multimedia file formats written on the CD-ROM elegantly solved the traditional cross-platform incompatibility problem among computers that run different operating systems. Early in 1995, the IEEE Education Society decided to publish a special issue of the *IEEE Transactions on Education* accompanied by a CD-ROM that could be read with a Web browser[1, 2].

A call for contributions to the August 1996 special issue appeared in March 1995. Each contribution, the call specified, would consist of a printed portion and a supplement on the CD-ROM that could include files in standard Web multimedia file formats, as well as executable files and other software. Contributors submitted content for both the printed portion and for the CD-ROM supplement as files on floppy disks.

When the guest editor for the special issue, Marion Hagler, accepted a ten-month temporary position in Japan beginning in October 1995, William Marcy, an associate editor for the special issue, placed all the files on a controlled-access file server in Texas so Hagler could get to them from Japan. The associate editor in charge of the review process, Jerry Yeargan, (1993-94 President of the IEEE Education Society) took advantage of that access to conduct the entire
