Perspectives On Equality Constructing A Relational Theory:

Relational Theory Christine M. Koggel, Ami Harbin, Jennifer J. Llewellyn, 2025-04-18 Relational theory starts from the ontological fact of our being in networks of relationships and draws out what this means for theories of knowledge and for moral and political theory This book uses insights from feminist relational theory to outline the ontological epistemological and moral political implications of this theoretical approach The chapters in this volume focus on relationships of power and oppression how these relationships shape who is taken to have knowledge and who is dismissed or ignored and what all of this means for theories of equality justice and moral and political theory more generally A focus on relationships of power and oppression opens up an examination into structures such as colonialism and capitalism that shape interconnected networks of relationships between humans and human and non human entities and ecosystems This volume which now includes eight additional chapters published both before and after the original special issue offers a significant step forward in the development of feminist relational theory Following early forays in identifying and criticizing mainstream liberal theory in the Western tradition chapters in this collection draw on approaches by anti oppression theorists found in critical disability critical race anti colonial decolonial and non Western theories to further broaden the descriptions and analyses of relationships and networks of relationships and to extend and advance feminist relational theory and its applications The chapters in this book were originally published in the Journal of Global Ethics

Being Relational Jocelyn Downie, Jennifer J. Llewellyn, 2011-11-10 At the heart of relational theory lies the idea that the human self is fundamentally constituted in terms of its relations to others For relational theorists the self not only lives in relationship with and to others but also owes its very existence to such relationships In this groundbreaking collection leading relational theorists explore core moral and metaphysical concepts while health law and policy scholars respond by analyzing how such considerations might apply to more practical areas of concern Innovative and self reflexive Being Relational brings a powerful theoretical framework to health law and policy studies In so doing it makes a bold contribution to scholarship and will appeal to a broad range of thinkers especially those with an interest in social justice and who seek to understand the complex ways in which power is created and sustained relationally

Restorative Justice, Reconciliation, and Peacebuilding Jennifer J. Llewellyn, Daniel Philpott, 2014-04-17 All over the world the practice of peacebuilding is beset with common dilemmas peace versus justice religious versus secular approaches individual versus structural justice reconciliation versus retribution and the harmonization of the sheer number of practices involved in repairing past harms Progress towards resolving these dilemmas requires reforming institutions and practices but also clear thinking about basic questions What is justice And how is it related to the building of peace The twin concepts of reconciliation and restorative justice both involving the holistic restoration of right relationship contain not only a compelling logic of justice but also great promise for resolving peacebuilding s tensions and for constructing and assessing its institutions and practices This book furthers this potential by

developing not only the core content of these concepts but also their implications for accountability forgiveness reparations traditional practices human rights and international law

Personal Relationships of Dependence and Interdependence in Law Law Commission of Canada, 2002 Cardiac cell biology has come of age Recognition of activated or modified signalling molecules by specific antibodies new selective inhibitors and fluorescent fusion tags are but a few of the tools used to dissect signalling pathways and cross talk mechanisms that may eventually allow rational drug design Understanding the regulation of cardiac hypertrophy in all its complexity remains a fundamental goal of cardiac research Since the advancement of adenovirally mediated gene transfer transfection efficiency is no longer a limiting factor in the study of cardiomyocytes A limiting factor in considering cell transplantation as a strategy to repair the damaged heart is cell availability at the right time Cardiac gap junctions intercellular communication channels that allow electrical and metabolic coupling and play an important role in arrhythmogenesis are now understood to be exquisite sensors of cardiac change The reports in this volume include elegant studies that made use of cutting edge technological advances and many specialized reagents to address these issues

Gender Justice and Development: Vulnerability and Empowerment Eric Palmer, 2017-10-02 Vulnerability and empowerment are central concepts of contemporary development theory and ethics Vulnerability associated with human interdependence is a wellspring of values in care ethics while vulnerability arising from social problems demands remedy of which empowerment is frequently the just form Development planners and aid providers focus upon improving the wellbeing of the most vulnerable especially women by empowering them economically socially and politically Both vulnerability and empowerment are considered in this volume Drydyk argues that empowerment is necessarily relational not simply a matter of expanding choices Koggel reviews Drydyk's discussion through the lens of feminist relational theory considering how norms structures and institutions shape delimit and promote empowerment Presbey examines empowerment in East African women's lives through the writings and biography of Wangari Maathai Kosko considers indigenous self governance and participation in shared governance Khader reflects upon postcolonial feminist criticism of the concept of adaptive preference Panitch discusses the economic vulnerability that surrounds the global market in surrogate birth Pandey provides a review of third world eco feminist activism and literature Cudd envisions international humanitarian intervention to support female autonomy against oppressive state and social institutions This book was originally published as a special issue of the Journal of Global Ethics

The Disabled Contract Jonas-Sébastien Beaudry, 2021-03-18 Social contract theories generally predicate the authority of rules that govern society on the idea that these rules are the product of a contractual agreement struck between members of society These theories embody values such as equality reciprocity and rationality that are highly prized within our culture Yet a closer inspection reveals that these features exclude other important values relations and even persons from the realm of contractual morality and justice especially people with severe intellectual disabilities Jonas Sébastien Beaudry explores the moral status of intellectually disabled people in social contract thought and argues that this

tradition needs to be revisited to include the most vulnerable Addressing this problem will have concrete repercussions in law and policy because many issues that people with disabilities face are connected to deeply rooted assumptions about their status as full citizens or full members of our moral political and legal communities Perspectives on Equality Christine M. Koggel, 1998 Beginning with liberalism's foundational idea of moral equality as the basis for treating people with equal concern and respect Christine Koggel offers a modified account of what makes human beings equal and what is needed to achieve equality Koggel utilizes insights from care ethics but switches the focus from care as a moral response within personal relationships to the broader network of relationships within which care is given or withheld The result is an account of moral personhood and agency that is richer than the view propounded by liberal theory and care ethics This exciting and original work challenges theoretical resistance to the idea that relationships are relevant to an understanding of equality and it provides an opening to a critical analysis of relationships and care that informs and transforms our understanding of what is needed to treat all people with equal concern and respect Telling the Truths Tristan Anne Borer, RIREC Project on Post-Accord Peace Building, 2006 The volume examines whether truth telling mechanisms can contribute to sustainable peace and if so how and under what conditions **Moral Issues in Global Perspective** Christine Koggel, 1999-06-24 Moral Issues in Global Perspective seeks to challenge standard approaches to morality and moral issues shaped by Western liberal theory and to extend the inquiry beyond the context of North America It includes critiques of traditional liberal accounts of rights justice and moral values that raise questions about the treatment of disadvantaged groups within liberal societies as well as in other societies and across societies It covers a broader range of issues and arguments than most textbooks on practical ethics It incorporates work by race class feminist and disability theorists that provides new perspectives on issues such as reproduction euthanasia censorship and the environment The collection places moral issues in a global context by providing selections by moral and political theorists from many different parts of the world Book Review Digest, 2001

The Review of Metaphysics, 1999 **Hypatia**, 2008 **Women, Political Philosophy and Politics** Liz Sperling, 2001 This new book explores the interface between political philosophy and politics looking at the effects of philosophical traditions on the contemporary relationship between women and politics Analysing key concepts in political philosophy the author illustrates how common ideas entrenched in the development of political thought and practice have become almost intractable truths that continue to differentiate between the sexes in politics Liz Sperling looks in detail at the works of Plato Aristotle Hobbes Locke Rousseau Mill Marx Rawls and Nozick considering general themes to which they have all contributed such as the state of nature the state markets citizenship and representation The focus then turns to the specific contributions of the philosophers that continue to influence the association of women to politics These include an analysis of Greek classicists establishment of androcracy Rousseau's treatise on education for citizenship and nineteenth century ideas of equality In conclusion the themes demonstrated throughout are drawn together to show how they translate

into contemporary policy on women in politics Offering an original insight into the ways in which political thought influences political practice this will be essential reading in a key area of politics philosophy and women s studies **New Books on Women and Feminism** ,1999 **Contemporary Moral Issues** Wesley Cragg,Christine M. Koggel,2004-01-30 Trusted and respected throughout five editions Contemporary Moral Issues provides students with a probing view of today s ethical landscape Compiled from a Canadian perspective and incorporating contemporary court and legal material in depth introductions and renowned pedagogical tools Cragg Koggel s text is a balanced and provocative introduction to moral issues With new chapters on War and Terrorism and Business Ethics and over 30 articles added to this edition Contemporary Moral Issues reflects the issues in today s world your world *American Book Publishing Record* ,1997 Mind ,1998 Issues for 1896 1900 contain papers of the Aristotelian Society International Law and Justice John R.
