Perspectives On Farming Systems Research And Extension:

Perspectives on Farming Systems Research and Extension Peter E. Hildebrand, 1986 **A History of Farming Systems Research** Michael P. Collinson, 2000 Farming Systems Research FSR may be defined as a diagnostic process providing a collection of methods for researchers to understand farm households and their decision making Its applications use this understanding to increase efficiency in the use of human and budgetary resources for agricultural development including research extension and policy formulation Initiated by the then International Association for Farming Systems Research and Extension now International Farming Systems Association and developed with support from FAO this book provides a detailed history of FSR While it includes the application of FSR to developed country agriculture its main focus is on FSR in its original role with small scale resource poor farmers in less developed countries *Rural and Farming Systems Analysis* John Barry Dent, Murray J McGregor, 1994 The Farming Systems Research and Extension approach adopts a multidimensional perspective and has been widely used to bring about rural change in many developing countries The approach has traditionally been less used in Europe where research has tended to concentrate on increasing production However with the current emphasis within the European Union on restricting surpluses and on environmental and social protection circumstances are more appropriate to the farming systems approach Changes to rural infrastructures and agricultural production in Central and Eastern Europe may also favor the approach This book is the first to define the issues of farming systems research as they might be applied within a European context and extended to rural systems as a whole Consisting of 27 chapters it is divided into five parts covering conceptual background contextual setting alternative production systems understanding farm households and systems methodologies Contributions are included from the UK Ireland France Germany Spain Portugal Denmark Netherlands Finland Estonia and Greece The book is aimed at a wide range of readers in agricultural economics and rural studies **Social Sciences And Farming Systems Research** Jeffrey R Jones, Ben J Wallace, Robert Booth, Robert E Rhoades, 2019-07-11 The publication of this book has required the cooperation of many people along the way From its very conception the project of bringing together experiences from ongoing Farming Systems Research projects has faced a problem of communication due to the dispersal of the participants Dr William Partridge and Lynne Goldstein were instrumental in the initial presentation of the symposium on Social Science participation in Farming Systems Research at the 83rd Annual Meeting of the American Anthropological Association Ben Wallace has done an admirable job not only as editor but as a point man throughout the process of organizing the conference and preparing the manuscript He deserves credit for expediting countless activities that could never have otherwise been accomplished because of the vagaries of international mails and telecommunications **Farming Systems Research into the 21st Century: The New Dynamic** Ika Darnhofer, David Gibbon, Benoît Dedieu, 2012-05-30 Farming Systems Research has three core characteristics it builds on systems thinking it depends on the close collaboration between social and biophysical sciences

and it relies on participation to build co learning processes Farming Systems Research posits that to contribute towards sustainable rural development both interdisciplinary collaborations and local actor engagement are needed Together they allow for changes in understanding and changes in practices This book gives an overview of the insights generated in 20 years of Farming Systems Research It retraces the emergence and development of Farming Systems Research in Europe summarises the state of the art for key areas and provides an outlook on new explorations especially those tackling the dynamic nature of farming systems and their interaction with the natural environment and the context of action
