

Discussions About the Technical Communication Profession: Perspectives from the Blogosphere

Yvonne Cleary

Abstract

Purpose: To examine how blogs reflect practitioner views of professionalization topics (such as education, professional societies, and value and status).

Method: Content analysis of 10 practitioner blogs, focusing on professional topics of status, education, professional societies, and the effects of technology.

Results: Although the bloggers under study appear to function as an effective community of practice, they are not currently directing their actions or attention toward the traditional goals of professionalization, such as licensing and accreditation.

Conclusions: The latent themes that emerge show that many of the goals of professionalizing (such as standardizing routes into the field and increasing respect for the work) are also concerns of practitioners.

Keywords: professionalization, blogs, content analysis, education, status, professional societies, technology

Practitioner's Takeaway

- Professions, as distinct from regular occupations, exhibit several distinct characteristics, including market closure, a fixed educational path, and high status for practitioners.
- Academics in technical communication have, for some time, sought to examine routes towards professionalization for the field. However, it is not clear that professionalization has been a goal for practitioners.
- The paper examines whether, and in which respects, practitioner blogs discuss topics relevant to professionalization.
- The paper outlines a study that analyzed 708 blog posts from 10 practitioner blogs over a 1-year period.
- The study finds that these bloggers have several concerns that dovetail with goals of professionalization, including seeking higher status for the field, discussing education and career paths, and considering the role and importance of professional societies.
- The study also finds that these bloggers currently function as an effective community of practice, by sharing resources, contributing to the field, and reading and commenting on one another's blogs.
