Knowing the Adversary Keren

Yarhi-Milo, 2014-07-21 States are more likely to engage in risky and destabilizing actions such as military buildups and preemptive strikes if they believe their adversaries pose a tangible threat Yet despite the crucial importance of this issue we don't know enough about how states and their leaders draw inferences about their adversaries long term intentions Knowing the Adversary draws on a wealth of historical archival evidence to shed new light on how world leaders and intelligence organizations actually make these assessments Keren Yarhi Milo examines three cases Britain's assessments of Nazi Germany's intentions in the 1930s America's assessments of the Soviet Union's intentions during the Carter administration and the Reagan administration's assessments of Soviet intentions near the end of the Cold War She advances a new theoretical framework called selective attention that emphasizes organizational dynamics personal diplomatic interactions and cognitive and affective factors Yarhi Milo finds that decision makers don't pay as much attention to those aspects of state behavior that major theories of international politics claim they do Instead they tend to determine the intentions of adversaries on the basis of preexisting beliefs theories and personal impressions Yarhi Milo also shows how intelligence organizations rely on very different indicators than decision makers focusing more on changes in the military capabilities of adversaries Knowing the Adversary provides a clearer picture of the historical validity of existing theories and broadens our understanding of the important role that diplomacy plays in international security

The Logic of Nuclear Terror Roman Kolkowicz, 2020-11-19 Originally published in 1987 The Logic of Nuclear Terror presented a much needed critical review of the premises concepts and policy prescriptions of deterrence theories and doctrines at the time In particular authors address the historical validity theoretical vitality and policy relevance of nuclear deterrence theories and doctrines the ways in which technological and political change have affected the original concepts of nuclear war and deterrence strategies and the ways in which such changes have affected policy and doctrine and realistic alternative ways of thinking about strategy in the changing context of new military technologies and international politics The outstanding group of international contributors to this volume include both proponents and critics of current doctrine The result is an unusually well balanced and unique contribution to our understanding of nuclear deterrence theory and practice As such it will be of interest to students policymakers and teachers of international relations defense and foreign policy US Soviet relations and arms control and disarmament

American Historians and the Atlantic Alliance Lawrence S. Kaplan, 1991 This conference based work offers the views of seven American diplomatic historians on the role of NATO from an American perspective placing the alliance within the larger frame of America's foreign policy as a superpower Each reveals an aspect of how NATO has fashioned the American Century

1982-1983, 1985 **American Perceptions of the Soviet Union as a Nuclear Adversary** Erik Beukel, 1989 Beukel political science Odense U Denmark analyzes the ways in which American governments

have perceived the Soviet Union as a nuclear adversary since the early 1960s American images he finds are influenced not only by Soviet behavior but also by traditionally dominating views of the US's proper role in the world as well as by the domestic political process Distributed in the US by Columbia U Press Annotation copyrighted by Book News Inc Portland OR
