В завершение отметим, что объектом идентификации и делимитации обязательно должна быть сложившаяся, объективно существующая агломерация. Вполне допустима и продуктивна (например, в рамках стратегического планирования) постановка задачи выделения территории, имеющей потенциал для оформления в качестве агломерации. Для решения этой задачи используются те же методы и критерии, что и для выделения существующих агломераций, с той только разницей, что пороговые значения индикаторов связности устанавливаются на более низком уровне (с прицелом на повышение связности в перспективе). Эти задачи могут и совмещаться, если в рамках одного исследования устанавливаются как фактическая граница агломерации, соответствующая текущим уровню и конфигурации связей, так и ее перспективная граница, исходя из гипотезы о расширении территории агломерации со временем.
