**Character Evidence in the Courts of Classical Athens**

Vasileios Adamidis, 2016-11-25 There has been much debate in scholarship over the factors determining the outcome of legal hearings in classical Athens Specifically there is divergence regarding the extent to which judicial panels were influenced by non legal considerations in addition to or even instead of questions of law Ancient rhetorical theory and practice devoted much attention to character and it is this aspect of Athenian law which forms the focus of this book Close analysis of the dispute resolution passages in ancient Greek literature reveals striking similarities with the rhetoric of litigants in the Athenian courts and thus helps to shed light on the function of the courts and the fundamental nature of Athenian law The widespread use of character evidence in every aspect of argumentation can be traced to the Greek ideas of character and personality the inductive method of reasoning and the social political and institutional structures of the ancient Greek polis According to the author's proposed method of interpretation character evidence was not a means of diverting the jury's attention away from the legal issues instead it was a constructive and relevant way of developing a legal argument

Symposium, 2001 Logos J. G. F. Powell, University of London. Institute of Classical Studies, 2007 In the ancient world Classical rhetoric and its practices raised major ethical doubts and questions which have continued to affect even to prejudice our judgment of orators and oratory today One of the key components of practical oratory was rational argument The six chapters in this volume examine different aspects of the role of rational argument in Classical oratory and rhetoric and its later tradition Michael Gagarin discusses the role of argumentation in the works of Antiphon the earliest Greek orator whose continuous texts survive Christos Kremmydas analyses the argumentative strategies in a political speech of Demosthenes the attack on the law of Leptines Demosthenes 20 Two chapters then focus on Cicero Jakob Wisse discusses Cicero's self-conscious use of logical structure and the ancient theory of the classification of issues so called stasis theory while Lynn Fotheringham examines Cicero's habit of having his cake and eating it i.e. running two incompatible lines of argument at the same time Peter Mack surveys the interrelation of rhetoric and dialectic in the Renaissance highlighting the importance of the latter and its influence on styles of composition in English as well as Latin Finally Malcolm Heath describes a fascinating experiment in the teaching of ancient rhetorical techniques to modern students showing that the study of ancient rhetoric can be not only an interesting aspect of cultural history but also an effective means of developing the transferable skills valued by today's employers **A Scientific Theology: Reality** Alister E. McGrath, 2001 A Scientific Theology is a ground breaking work of systematic theology in three volumes Nature Reality and Theory Written by one of the world's best known theologians these volumes together represent the most extended and systematic exploration of the relation between Christian theology and the natural sciences yet produced Thoroughly ecumenical in approach A Scientific Theology is a significant work for Catholic Orthodox Protestant and evangelical readers Each volume is marked throughout by a sustained and critical engagement with the history and

philosophy of the natural sciences and by a passionate commitment to the legitimacy of theology as an academic discipline. The three volumes together attempt to present an essentially linear argument from nature to theory so that questions of how reality is represented will be dealt with entirely in the final volume though preliminary discussions of aspects of reality are naturally included in this present volume. The second volume in the series thus provides a detailed and thorough examination and defense of theological realism. Its themes are set against the backdrop of radical changes in Western philosophy and theology resulting from the collapse of the Enlightenment project and the consequent fragmentation of intellectual discourse. Engaging critically with writers such as George Lindbeck and John Milbank, McGrath offers a sparkling and sophisticated affirmation of theological realism against its modern and postmodern critics. His refutation of the claim that the rise of philosophical nonfoundationalism entails the abandoning of any form of realism is of particular importance as is his application of the highly influential form of critical realism developed by Roy Bhaskar. Viewed as a whole, *Reality* represents a sustained engagement with natural theology as the basis of a broader dialogue between the Christian tradition and other religious traditions. Book jacket
