ABSTRACT

The health sector around the world faces the continuous challenge of improving the services provided to patients. Therefore, digital transformation in health services plays a key role in integrating new technologies such as artificial intelligence. However, the health system in Peru has not yet taken the big step towards digitising its services, currently ranking 71st according to the World Health Organisation (WHO). This article proposes a learning health system for the management and monitoring of private health services in Peru based on the three key components of intelligent health care: (1) a health data platform (HDP); (2) intelligent technologies (IT); and (3) an intelligent health care suite (HIS). The solution consists of four layers: (1) data source, (2) data warehousing, (3) data analytics, and (4) visualization. In layer 1, all data sources are selected to create a database. The proposed learning health system is built, and the data storage is executed through the extract, transform and load (ETL) process in layer 2. In layer 3, the Kaggle dataset and the decision tree (DT) and random forest (RF) algorithms are used to predict the diagnosis of disease, resulting in the RF algorithm having the best performance. Finally, in layer 4, the intelligent health-care suite dashboards and interfaces are designed. The proposed system was applied in a clinic focused on preventing chronic kidney disease. A total of 100 patients and six kidney health experts participated. The results proved that the diagnosis of chronic kidney disease by the learning health system had a low error rate in positive diagnoses (err = 1.12%). Additionally, it was demonstrated that experts were "satisfied" with the dashboards and interfaces of the intelligent health-care suite as well as the quality of the learning health system.

Peru Improving Health Care For The Poor:

Peru, 1999-01-01 The Peruvian health sector has recovered rapidly after collapsing in the late 1980s and early 1990s as a result of hyperinflation and terrorism Total public and private spending on health rose by over 50% in real terms in the three years after 1994 The supply of health services increased sharply Health outcomes have also improved rapidly in recent years Several reforms were attempted during the health sector's recuperative years Some were successful others failed To increase the chances for success in the future policymakers in Peru must face three key challenges continue to reduce the large gap between the health status of the poor and that of the nonpoor increase the resources assigned to provide care for the poor increase the efficiency in the use of these resources This report is meant to help the Government continue to develop its agenda to improve health care for the poor Its focus is on poverty and particularly on ways to improve the Ministry of Health's primary health subprogram rather than on sector wide reforms to increase efficiency The report emphasizes that there is much to be gained by sustaining and deepening the reforms directed toward improving health care for the poor while using the shift in focus and responding to the key challenges The executive summary and introduction are provided in both English and Spanish **Peru** World Bank The, 1999 The health sector development in Peru experienced a

quick recovery after collapsing in the late 1980s and early 1990s as a result of hyperinflation and terrorism A marked improvement in child malnutrition and infant mortality has also been experienced recently But in spite of input and outcome improvements policy makers are facing challenges such as a reducing the health status gap between the poor and that of the non poor b increasing resources for the provision of health care to the poor and c increasing the efficiency in the use of these resources The report reviews the health sector financing and delivery systems the progress made thus far in health outcomes and health reforms both in financing of services and the provision of health It further recommends best practices for strengthening management planning and information systems within the Ministry of Health Conclusions and recommendations emerge from this report conveying that much can be gained by sustaining and deepening those reforms directed at health improvements for the poor **Restoring Fiscal Discipline for Poverty Reduction in Peru** World Bank, 2003 **An Opportunity for a Different Peru** Marcelo Giugale, Vicente Fretes Cibils, 2007 For the first time in the

republican history of Peru the presidential transition takes place in democracy social peace fast economic growth and favorable world markets In other words there has never been a better chance to build a different Peru a richer country more equal and governable There are multiple ways to achieve that goal New reforms must stem from a widespread and participatory debate one of a common vision conceived for and by Peruvians This book aims at making a technical and independent contribution to such debate it summarizes the knowledge available about the challenges to be faced by the new administration The study does not recommend silver bullets but suggests policy options It is based on the analysis of the current reality and in six decades of relationships with Peru in which the Bank has implemented more than 100 projects and

prepared more than 500 technical reports covering the wide range of development topics. When necessary, the study provides lessons that the Bank has learned elsewhere. The study provides a conceptual framework to the analysis of the country's 34 economic sectors and the two historical perspectives behind them. In doing so, it offers a comprehensive reform agenda that sheds light on possible priorities and courses of action.

Advancing the Human Right to Health José M. Zuniga, Stephen P. Marks, Lawrence O. Gostin, 2013-07-04. *Advancing the Human Right to Health* offers a prospective on the global response to one of the greatest moral, legal, and public health challenges of the 21st century: achieving the human right to health as enshrined in the Universal Declaration of Human Rights (UDHR) and other legal instruments. Featuring writings by global thought leaders in the world of health and human rights, the book brings clarity to many of the complex clinical, ethical, economic, legal, and socio-cultural questions raised by injury, disease, and deeper determinants of health such as poverty. Much more than a primer on the right to health, this book features an examination of profound inequalities in health which have resulted in millions of people condemned to unnecessary suffering and hastened deaths. In so doing, it provides a thoughtful account of the right to health's parameters, strategies on ways in which to achieve it, and discussion of why it is so essential in a 21st-century context. Country-specific case studies provide context for analysing the right to health and assessing whether and to what extent this right has influenced critical decision-making that makes a difference in people's lives. Thematic chapters also look at the specific challenges involved in translating the right to health into action. *Advancing the Human Right to Health* highlights the urgency to build upon the progress made in securing the right to health for all, offering a timely reminder that all stakeholders must redouble their efforts to advance the human right to health.

Perspectives on Poverty and Health Care, 2005. **Restoring Fiscal Discipline for Poverty Reduction in Peru** World Bank, 2003. Part of a series of World Bank country reports, this publication examines public expenditure management in Peru in order to highlight the development challenges facing the country and consider possible policy options. Topics discussed include restoring fiscal discipline, reorienting the budget towards pro-poor expenditure, improving the efficiency of public expenditure, addressing the risks of decentralisation, upgrading the civil service, improving governance, and reducing corruption and environmental mining policies.

The Work of Hospitals William C. Olsen, Carolyn Sargent, 2022-03-18. *The Work of Hospitals* is a volume on hospitals as clinical and social institutions. It foregrounds the tensions inherent in efforts to sustain functional health services in resource-poor states. Global ethnographic research shows how clinicians and patients struggle without adequate supplies and personnel in times of financial austerity. The chapters document a vast gulf worldwide between the idealized mission of the hospital and the implementation of this mission in everyday practice.
