Field Crops Protection Sub-Committee, Atlantic Provinces Agricultural Services Coordinating Committee (Canada), Nova Scotia. Department of Agriculture and Marketing, 1972 The purpose of this publication is to help farmers recognize the symptoms of diseases insects and other pests of field crops and to give general recommendations for control For specific chemical control methods readers should refer to the latest issue of Pub 100 Field Crop Recommendations in the Atlantic Provinces *Insect Pests of Field Crops* Leonard Haseman, 1920 *Insect Pests of Field Crops in Colour*, 1983 *Insect Pests of Field Crops* Christian Carl Burkhardt, University of Wyoming. Cooperative Extension Service, 1974 Field Crop Arthropod Pests of Economic Importance Peter A. Edde, 2021-08-21 Field Crop Arthropod Pests of Economic Importance presents detailed descriptions of the biology and ecology of important arthropod pests of selected global field crops Standard management options for insect pest control on crops include biological non chemical and chemical approaches However because agricultural crops face a wide range of insect pests throughout the year it can prove difficult to find a simple solution to insect pest control in many if not most cropping systems A whole farm or integrated pest management approach combines cultural natural and chemical controls to maintain insect pest populations below levels that cause economic damage to the crop This practice requires accurate species identification and thorough knowledge of the biology and ecology of the target organism Integration and effective use of various control components is often enhanced when the target organism is correctly identified and its biology and ecology are known This book provides a key resource toward that identification and understanding Students and professionals in agronomy insect detection and survey and economic entomology will find the book a valuable learning aid and resource tool Includes insect synonyms common names and geographic distribution Provides information on natural enemies Is thoroughly referenced for future research Insect Pests of Field Crops
