The book's chapters begin with introductions of leading companies with significant e-commerce expertise and at least two small case studies. They include 10 or more hands-on exercises encouraging readers to explore and analyze sites and a list of key terms and bibliographic citations. They conclude with 25-30 review questions and 6-10 projects for further investigation. Every chapter starts with an industry profile and two information boxes which serve as case studies and point to practical applications.
