Kalam Cosmological Arguments Revisited Andrew Loke,2022-05-03 A prominent issue in many contemporary philosophy of religion debates concerns whether the universe has a Designer This book moves the discussion ahead in a significant way by devising an original deductive formulation of the Teleological Argument TA which demonstrates that the following are the only possible categories of hypotheses concerning fine tuning and order i chance ii regularity iii combinations of regularity and chance iv uncaused and v design This book also demonstrates that there are essential features of each category such that while the alternatives to design are unlikely the Design Hypothesis is not and that one can argue for design by exclusion without having to first assign a prior probability for design By combining the TA with the Kalam Cosmological Argument KCA which it defends against various objections this book responds to the God of the gaps objection by demonstrating that the conclusion of the KCA TA is not based on gaps which can be filled by further scientific progress but follows from deduction and exclusion This is an open access book **Redesign Your Life Without Starting Over: Real Change Through**
