Cohen, 1997-06-30 A stellar roster of authors explores the role of the Internet is a vital new form of science instruction authentic Student Scientist Partnerships Numerous successful SSPs are detailed in this key resource for scientists educators students administrators parents and community leaders interested in nurturing and implementing positive educational change and improvement [Here Is a Human Being](#) Misha Angrist, 2010-11-02 Here is a Human Being delivers the first in depth look at the Personal Genome Project the effort to construct complete genomic maps of a specific human beings written by one of the study s ten human participants Misha Angrist recounts the project s fascinating nuances including the larger than life personalities of the research subjects the entrepreneurial scientists at the helm the bewildered and overwhelmed physicians and regulators who negotiated for it the fascinating technology it employed and the political social ethical and familial issues it continues to raise In the vein of James Shreeve s *The Genome War* Craig J Ventner s *My Life Decoded* and Francis J Collins *The Language of Life* Angrist s informed exploration of this cutting edge science is a gripping look at the present and future of genomics [Massive Change](#) Bruce Mau, Jennifer Leonard, Institute Without Boundaries, 2004-10 Massive Change is a modern illustrated primer on the new inventions technologies and events that are affecting the human race worldwide The book is a part of a broader research project by Bruce Mau Design intended to provoke debate and discussion about the familiar objects and techniques that are transforming our lives In essays interviews and provocative imagery aimed at a broad audience Massive Change explores the changing force of design in the contemporary world and in doing so expands the definition of design to include the built environment transportation technologies revolutionary materials energy and information systems and living organisms The book is divided into 11 heavily illustrated sections covering major areas of change in contemporary society such as urbanism and architecture the military health and living and wealth and politics introductory essay extended captions and interviews with leading thinkers including engineers designers philosophers scientists architects artists and writers Concluding the book is a graphic timeline of significant inventions and world events from 10 000 B C to the present Massive Change is the

umbrella name for wide ranging research project initiated by Bruce Mau Design and the Institute Without Boundaries a new post graduate design program headquartered at his studio The project will include not only this book but also a travelling exhibition public events an on line forum a documentary television project posters and a product line The overall aim of the project is to explore the changing force of design in the contemporary world The book focuses on the powerful newly designed technologies and systems and the failure of outmoded ones that increasingly influence our daily lives the debate about genetically modified foods the race to decode human the human genome the development and worldwide trafficking of sophisticated military weapons even the increasingly intrusive security systems at airports all are examples of massive changes that involve the field of design The book presents images and text that explore the impact of these subjects both the seemingly mundane as well as the mind boggling and microscopic As the text in Massive Change explains No longer associated simply with objects and appearances design is increasingly understood in a much wider sense as the human capacity to plan and produce desired outcomes The book is divided into 11 sections each focusing on a specific economy at work in the world today both the traditional such as manufacturing and the often invisible globalization and politics The pages combine images extended captions general essays and interviews in a clean simple design The imagery in Massive Change is irresistible and stands alone as a compelling reason to own this book beautiful For example a photo of a smoky blue blob as the caption explains is really Aerogel a material developed by NASA to collect fast moving space dust And a featherless naked chicken staring at us from the page is just that a new genetically engineered broiler that requires no plucking and yields more meat a boon to poultry producers yet a frightening harbinger of our future food supply Massive Change is a well designed intelligent visually provocative exploration of the myriad subjects percolating through popular culture those we read about in magazines and on Web sites but rarely understand in any meaningful way It poses the question Now that the human race can do almost anything what will we do next
