Memes Today Ai Image Generator Update:

Digital Influence Mercenaries James (J.F.) Forest, 2022-04-15 In today's online attention economy supply and demand have created a rapidly growing market for firms and entrepreneurs using the tactics, tools and strategies of digital influence warfare to gain profit and power. This book focuses on the more malicious types of online activity such as deception, provocation and a host of other dirty tricks conducted by these digital influence mercenaries. They can be located anywhere with an Internet connection: Brazil, China, Iran, Macedonia, Russia, Zimbabwe, and the targets of their influence efforts can be whomever and wherever they are paid to attack. They can do this for state governments willing to pay and provide their targeting instructions usually in support of foreign policy objectives and may have specific metrics by which they will assess the mercenaries' performance. Non-state actors including corporations and political parties can pay for these kinds of digital influence services as well. And in addition to being paid for services rendered, digital influence mercenaries can also profit simply by manipulating the targeted advertising algorithms used by social media platforms. James J. F. Forest describes in detail the various tools and tactics these mercenaries use to exploit the uncertainties, fears and biases of their targets including bots, deep fake images, fake news, provocation, deception and trolling. He also shows how they weaponize conspiracy theories and disinformation to manipulate people's beliefs and perceptions. Forest also highlights how government agencies and social media platforms are trying to defend against these foreign influence campaigns through such tactics as shutting down offending websites, Facebook pages and YouTube channels, tagging disinformation with warning labels, identifying and blocking coordinated inauthentic behavior and suspending social media accounts often permanently. European and North American governments have launched numerous investigations against these mercenaries and in some cases have brought criminal charges. Forest concludes with suggestions for how each of us can learn to identify disinformation and other malicious efforts and defend ourselves in the future.

Fake News Gaurav Sood, 2023-11-30 The news is a public good and needs to be handled with care and integrity. Even though lies and misinformation campaigns have been around for years, maybe since the dawn of journalism, the rate at which fake news is being spread these days is both alarming and preposterous. Almost every institution, public or private, uses fake news to further its own agenda. Governments and corporate houses spread fake news either through their own agencies or by influencing the popular media. In the business sector, fake news manifests itself in the form of exaggerated company returns and false data. This book analyses the impact of fake news both on products and personalities. Foregrounded in rigorous research, it examines how fake news is used by companies, political parties and leaders to create, amplify and even tarnish a brand's image and equity. It emphasizes how the customer's perception of a brand impacts and influences its reputation and acts as a decisive force in them gaining or losing competitive advantages. Elucidating how brands can interact both directly and indirectly with fake news, it brings to the reader's notice how sometimes brands are the victims of fake news and other times the purveyors.

Controversial Encounters in the

Age of Algorithms Sine N. Just, 2024-11-27 How can we have meaningful public conversations in the algorithmic age This book explores how digital technologies shape our opinions and interactions often in ways that limit our exposure to diverse perspectives and fuel polarization Drawing on the ancient art of arguing all sides of a case the book offers a way to revive public debate as a source of trust and legitimacy in democratic societies This is a timely and urgent book for anyone who cares about the future of democracy in the digital era
