Sectarianism Analyses Of Religious And Non Religious Sects:

Sectarianism Roy Wallis, 1975 One of the more extraordinary trends to have emerged in the West in the 1970s and one that has created considerable interest and curiosity particularly among sociologists is the proliferation of new religious sects Their followers are often young people disenchanted with the drug culture but seeking a new spirituality in an intensely materialistic society *Sectarianism* is a collection of essays studying this development Edited by Roy Wallis Lecturer in Sociology at the University of Stirling it is written by leading sociologists from Britain Canada and the USA and covers a wide range of sectarian movements in both the religious and the secular domains Included are case studies of The Aetherius Society a flying saucer cult the Hare Krishna movement the Jehovah s Witnesses and the United Family an investigation of societal reaction to Scientology and a fascinating study contrasting modern communitarian movements with the Shakers a once flourishing communitarian sect in the USA In the secular domain the book investigates organizations that though nonreligious exhibit characteristics of religious sects These include the Concept Houses one of the latest methods for rehabilitating drug addicts two contemporary left wing political groups and two ex patient therapeutic groups Neurotics Nomine and Recovery Inc *Sectarianism* will be indispensable to the sociologists of religion it should also prove of immense interest to the layman wishing to deepen his knowledge of this phenomenon beyond the superficial and often hysterical reporting in the press Publisher **Sectarianism without Sects** Azmi Bishara, 2022-03-01 This volume analyses the

transformation of social sectarianism into political sectarianism across the Arab world Using a framework of social theories and socio historical analysis the book distinguishes between *ta ifa* or sect and modern *ta ifiyya* sectarianism arguing that sectarianism itself produces imaginary sects It charts and explains the evolution of these phenomena and their development in Arab and Islamic history as distinct from other concepts used to study religious groups within Western contexts Bishara documents the role played by internal and external factors and rivalries among political elites in the formulation of sectarian identity citing both historical and contemporary models He contends that sectarianism does not derive from sect but rather that sectarianism resurrects the sect in the collective consciousness and reproduces it as an imagined community under modern political and historical conditions *Sectarianism without Sects* is a vital resource for engaging with the sectarian crisis in the Arab world It provides a detailed historical background to the emergence of sect in the region as well as a complex theoretical exploration of how social identities have assumed political significance in the struggle for power over the state
