

	MSRP	RANGE	ANNUAL FUEL COST	MPGe	FULL CHARGE*	WHY YOU SHOULD BUY IT	WHY YOU SHOULDN'T BUY IT
 2013 Tesla Model S (60 kwh)	\$69,900	<u>208 mi.</u>	\$850	95 mi.	1.2 charge in 20 mins. with Tesla Super-charger.	It's the top of the line, and there's no better EV you can drive.	It's priced like a top of the line car, and prices aren't coming down just yet.
 BMW i3	\$41,350	80-100 mi.	Est. \$500-600	Not yet announced	<u>30 mins.</u>	It's the coolest new thing from BMW, which has a well-earned reputation for making great cars.	It's compact, strange-looking, and just as limited in range as its competitors, but it costs over \$40,000.
 2013 Chevrolet Volt Plug-In Hybrid	\$39,145	38 mi. EV, 380 total	\$950	98 mi.	4 hrs.	GM just slashed the price for the 2014 Volt, and you'll be able to get one for \$27,495, after a \$7,500 tax credit.	Consumer Reports lists visibility, controls, and the fact that the car has only four seats as downsides.
 2013 Nissan Leaf	\$28,800	75 mi.	\$500	115 mi.	4 hrs.	It's been around since 2010, so Nissan has had the time to get the kinks ironed out.	Consumer Reports recommends the Leaf, but notes that it makes a "high-pitched whine" and counts "agility" as a downside.
 2013 Toyota Prius Plug-In Hybrid	\$32,000	11 mi. EV, 540 total	\$950	95 mi.	1.5 hrs.	It's an even greener car for those who already own or love the Prius.	According to CNET, most infotainment systems can't be used while driving, and the screen is subject to bad glare.
 Ford Focus Electric	\$39,200	76 mi.	\$500	105 mi.	4 hrs.	143 horsepower give it impressive acceleration, and it drives much like a conventional Focus.	The backseat isn't great, and there's not much trunk space.
 Honda Fit EV	\$36,625	82 mi.	<u>\$500</u>	118 mi.	3 hrs.	Car and Driver said it drives nicely, and notes the non-EV version has made several of the magazine's Top Ten lists.	It epitomizes the weird, scrunched up look of small EVs.
 Smart ForTwo Electric	\$28,800	68 mi.	\$600	107 mi.	6 hrs.	Electric drive is a natural fit for the tiny car, which got only mediocre mileage in the gasoline version.	The car's handling has been panned by Forbes, Motor Trend, and AutoWeek.
 Chevrolet Spark EV	<u>\$27,495</u>	82 mi.	\$500	<u>119 mi.</u>	7 hrs.	On a short drive, we found the car comfortable (even in back), and the motor provides plenty of pep.	The dinky looking EV won't win you any cool points.

household names shaking up the staid auto industry by creating a set of innovative electric vehicles that have wowed the marketplace and defied conventional wisdom. The company's market valuation now rivals that of long established automakers and to many industry observers Tesla is defining the future of the industry. But behind the hype Tesla has some serious deficiencies that raise questions about its sky high valuation and even its ultimate survival. Tesla's commitment to innovation has led it to reject the careful zero defects approach of other car manufacturers even as it struggles to mass produce cars reliably and with minimal defects. While most car manufacturers struggle with the razor thin margins of mid priced sedans Tesla's strategy requires that the Model 3 finally bring it to profitability even as the high priced Roadster and Model S both lost money. And Tesla's approach of continually focusing on the future even as commitments and deadlines are repeatedly missed may ultimately test the patience of all but its most devoted fans. In Ludicrous journalist and auto industry analyst Edward Niedermeyer lays bare the disconnect between the popular perception of Tesla and the day to day realities of the company and the cars it produces. Blending original reporting and never before published insider accounts with savvy industry analysis Niedermeyer tells the story of Tesla as it's never been told before with clear eyes objectivity and insight.

An Electric Vehicle Conversion Start-Up. Development of a Business Model Approach Fabian Hoeft, 2019-10-24 Master s Thesis from the year 2019 in the subject Business economics

Business Management Corporate Governance grade 1 3 Niederrhein University of Applied Sciences Krefeld School of Business and Economics language English abstract Today s world of mobility is characterised by a high degree of dynamism and change is becoming apparent Currently around 45 million passenger cars with conventional combustion engines powered by diesel or petrol are registered in Germany The share of electric vehicles is still well below one per cent Nevertheless the voices for sustainable and environmentally friendly transport are becoming louder One political measure in this respect is the implementation of driving bans in major German cities for some conventional combustion cars Car electrification is a solution for converting cars with conventional combustion engines to electric drives In the context of this thesis car electrification is regarded as a transition solution towards a nationwide electrified transport network of new electric cars A comprehensive concept of a business model approach from a start up perspective has been developed based on the analysis of the environment industry and customer needs Analysing the structure of the electrical conversion industry revealed that the subject of car electrification is hardly widespread and that current suppliers have only converted a smaller number of cars Besides the small scale of implementation the operational execution by existing suppliers can be considered

weak in terms of competitiveness and sustainability The analysis of the needs of potential customers of car electrification using qualitative and quantitative methods has led to incredibly valuable insights for the development of the business model approach A high openness to purchase was expressed considering some of the factors mentioned such as a test drive with an electrified car before purchase and a durability guarantee of the conversion The high relevance of initial acquisition costs compared to operating expenses in the purchase decision for passenger cars is another precious insight The business model approach developed based on the findings obtained differs fundamentally from the strategies of today s providers By incorporating the existing infrastructure of workshops and service points proximity to the end customer and scalability of the business operation can be achieved Partnering with universities and industry are two critical elements in the development of a sustainable secure and user friendly technical solution
