Artificial Intelligence on Complexity in Marketing ,2021-03-30 Bachelor Thesis from the year 2018 in the subject
 Business economics Offline Marketing and Online Marketing grade 1 9 Reutlingen University ESB Business School language
 English abstract The research question explored in this paper is about a potential benefit of AI in marketing which to this day
 is comparatively unexplored Even though the concept of AI has been around since the 1950s and current research and
 development make significant progress in this area scientific literature dealing with AI in marketing consists of less than 300
 published articles This paper distinguishes itself from related papers as it goes beyond investigating whether AI has an
 impact on business or not The results of this thesis shall not only show the potential AI holds for marketing but also suggest
 constant theoretical exploration of untapped fields in marketing The Internet of things IoT and big data changed customer

behavior and how businesses work This trend has led to a continued increase in complexity for marketing managers In 2017 8 4 billion devices were connected to the internet This number is forecasted to increase to 20 4 billion by 2020 The immense amount of data generated collected and analyzed has propelled new markets such as big data and artificial intelligence Marketing managers struggle to keep up with the sheer volume of data available and the surging complexity of marketing Connecting dispersed data and finding patterns leads to helpful insights which are said to reduce complexity Many businesses lack a clear strategy to tap into the benefits of AI and gain a competitive advantage *The Jewelers' Circular and Horological Review* ,1893 17th Innovative Applications of Artificial Intelligence Conference ,2005 *AI Magazine* ,1992
