The content of news has not changed much over the last century politicians celebrities wars crime and sports dominate past and present headlines Yet the ways in which journalists both gather and disseminate information have been turned on their head Gone are the days of editors assigning stories to writers who then research inquire and present what they found in a compelling yet accurate fashion Today's journalists are coding programming running analytics and developing apps These news nerds are industry professionals working in jobs at the intersection of traditional journalism and technologically intensive positions that were once largely separate Consequently news nerds have changed the institutionalized view of journalism which now accounts for these professionals News Nerds explores how technological economic and societal changes are impacting the institutionalized profession of journalism Allie Kosterich draws on a mixed methods research design that blends interviews social network analysis of LinkedIn data job postings and industry publications to make sense of how skills and practices become entrenched throughout the news industry Taken together these data reveal the ways in which the profession is evolving to incorporate new technological skillsets and new routines of production In telling these stories and sharing these findings Kosterich directly confronts what happens when new skillsets and new ways of understanding and producing news start to collide with the old routines of journalism News Nerds introduces the notion of institutional augmentation a process of institutional change that is not restricted to the expected binary outcome of the reinstitutionalization of something new or failure as a fleeting fad Instead as in the case of news nerds and journalism there exists an alternative possibility in the coexistence of supplementary institutions News Nerds provides a timely and relevant analysis of contemporary journalism and a model for understanding how industries react to the emergence of new career trajectories and new categories of employment "One more thing" Charlotte Erdmann, 2011 *Update*, 1982

Dictionary of Acronyms and Technical Abbreviations Jakob Vlietstra, 2012-12-06 My first encounter with acronyms took place when I was ten years old and growing up in an occupied country during the Second World War My father proudly announced one day that despite the ban imposed by the occupying administration he had managed to get a radio installed and could receive the BBC All acronyms used in this introduction are listed in this dictionary To me the meaning of BBC was that we would receive different information about the war than we got from the usual censored broadcasts There was of course the well known acronym associated with the NT but at that time I did not realize that it meant more than the postal service in those years a deteriorated service Gradually the daily use of acronyms grew Most of the newly acquired three and
