Carbonate Platform Slopes — A Record of Changing Conditions

Hildegard Westphal, 1998-09-17 Periplatform slope sediments from the Bahamas serve as an example for a small scale sedimentologic record of environmental changes Carbonate platforms react sensitively to sea level fluctuations Therefore sediments deposited on the slope during lowstands differ in composition from highstand deposits A second focus is the early diagenetic alteration and cementation of these sediments with their high diagenetic potential This book contributes to and discusses new developments in carbonate sedimentology such as the concepts of highstand shedding and early burial diagenesis which also have an impact on reservoir studies *Bivalvia neogenica (Lucinoidea-Mactroidea)* Werner E.
