Quantitative Evaluation Of Hiv Prevention Programs:

Quantitative Evaluation of HIV Prevention Programs Edward H. Kaplan, Ron Brookmeyer, 2008-10-01 How successful are HIV prevention programs Which HIV prevention programs are most cost effective Which programs are worth expanding and which should be abandoned altogether This book addresses the quantitative evaluation of HIV prevention programs assessing for the first time several different quantitative methods of evaluation The authors of the book include behavioral scientists biologists economists epidemiologists health service researchers operations researchers policy makers and statisticians They present a wide variety of perspectives on the subject including an overview of HIV prevention programs in developing countries economic analyses that address questions of cost effectiveness and resource allocation case studies such as Israel's ban on Ethiopian blood donors and descriptions of new methodologies and problems **Handbook of Economic**

Evaluation of HIV Prevention Programs David R. Holtgrave, 1998-10-31 If resources for HIV prevention efforts were truly unlimited then this book would be entirely unnecessary In a world with limitless support for HIV prevention activities one would simply implement all effective or potentially effective programs without regard to expense We would do everything useful to prevent the further spread of the virus that has already claimed hundreds of thousands of lives in the United States and millions of lives worldwide Unfortunately funding for HIV prevention programs is limited Even though the amount of available funding may seem quite large especially in the United States it is still fixed and not sufficient to meet all needs for such programs This was very well illustrated in the summer of 1997 when over 500 community based organizations applied for a combined total of 18 million of HIV prevention funding from the U S Centers for Disease Control and Prevention CDC Less than one fifth of these organizations received support via this funding mechanism Hence although 18 million may seem like a large amount of money at first blush it is not enough to meet all of the prevention needs that could be addressed by these community based organizations **The New Public Health and STD/HIV Prevention** Sevgi O. Aral, Kevin A.

Fenton, Judith A. Lipshutz, 2012-12-09 Despite effective approaches to prevention STD and HIV infection rates remain fairly constant Targeting implementation and monitoring of interventions have posed widespread problems and the recent spate of cuts to prevention budgets has made these roadblocks even more challenging It is clear that working in sexual health requires both a deeper understanding of STI HIV epidemiology and an ongoing quest for up to date realistic prevention strategies The New Public Health and STD HIV Prevention offers readers leading edge access to both Focusing on social determinants of sexual health at risk populations critical factors in approaches to prevention and reviews of new research this authoritative volume explores areas as varied as HPV prevention technology based interventions migration as a factor in disease transmission and competencies key to effective leadership in the field Dispatches from the frontlines of theory research and practice in the U S and abroad include Personal risk public impact balancing individual rights and STD HIV prevention Distribution of prevention resources and its impact on sexual health Prevention measures in diverse populations

of women Toward a better approach to preventive interventions with men who have sex with men Adolescent sexual health and STIs Reducing disparities in sexual health lessons from the campaign to eliminate infectious syphilis Public health professionals of all backgrounds interested in or working in improving sexual health will find The New Public Health and STD HIV Prevention an indispensable guide to conceptualizing the problems and clarifying possible solutions **Speaking the language of power** Edited by David Fetterman (Professor of Stanford, University, USA), 2014-04-08 First Published in 1993 Routledge is an imprint of Taylor Francis an informa company **HIV/AIDS Prevention Newsletter**, 1991 **AIDS & Public Policy Journal**, 2002 HIV/AIDS Prevention, 1990 *Transgender HIV/AIDS Prevention Program Manual* Walter O. Bockting, 1993 **The Handbook for AIDS Prevention in Africa** Family Health International (Organization), 1990 *California HIV Prevention Plan* California Community Planning Working Group, 1995 *OR/MS Today*, 2002 **External Treatment Effects and Program Implementation Bias** Tomas J. Philipson, 2000 This paper discusses the definition and identification of external treatment effects and experimental designs capable of detecting these effects External effects occur when the outcome of a given individual is affected by the treatment assignments of other individuals The paper argues that two stage randomization schemes which randomize allocation of treatments across communities and randomizes the treatments themselves within communities are useful for identifying private and external treatment effects The importance of external treatment effects are illustrated in the context of several health economics applications the impact of R D subsidies smoking prevention programs for youth and the evaluation of HIV prevention programs currently taking place in Africa **Assessing the Need for HIV Prevention Services**, 1999 **Evaluationsforschung und Qualitätssicherung in der personalkommunikativen AIDS-Prävention** Bernhard Bühlren-Armstrong, 1998 A *Systematic Evaluation of Culturally Sensitive HIV/AIDS Prevention Interventions in the US, 1996-2007* Ya-Chien Wang, 2008 **The British National Bibliography** Arthur James Wells, 2002 **Bulletin on Narcotics**, 2001 *American Journal of Public Health*, 2009 *Annual Review of Public Health* Gilbert S. Omenn, 1996-05 **Multicultural AIDS Prevention Programs** Robert T. Trotter, 1996 Multicultural AIDS Prevention Programs explores the behaviors of injection drug users and crack users to determine HIV risk factors and to help you reevaluate intervention and education programs Program directors learn how to design and implement effective programs based on the research presented Among the important issues you will learn about are risk behavior and stages of behavior change for condom and needle use predictors of loss for follow up among drug users participating in HIV AIDS prevention projects the role of psychosocial domains as causes for HIV risk behaviors and as resources for behavioral change condom use as AIDS prevention among drug users and high risk women sexual orientation and HIV risk behaviors among injection drug users IDUs and crack smokers the utility of the stages of change model in assessing intervention readiness and measuring the outcome of modifying drug related and sexual risk behaviors of active drug users an evaluation of the effect on risk behaviors of an HIV testing and counseling program among

African American in the U S and Puerto Rican in the U S and Puerto Rico drug abusers a cost analysis of outreach services to IDUs and street youth a comparison of outreach costs with the medical costs of treating an HIV infected individual an examination of the National Institute on Drug Abuse NIDA cohort of out of treatment IDUs and crack users to determine variables associated with entering drug treatment factors correlated with treatment retention and the extent to which entering treatment is related to cessation of injection drug and crack use Multicultural AIDS Prevention Programs gives you an explanation for and better understanding of risk behaviors among drug users You will use this insight in your efforts as a professional in drug abuse prevention and treatment or HIV AIDS education research and outreach to develop and implement the most effective approaches for successfully changing client behavior
