Machine Learning Approaches to Human Movement Analysis Matteo Zago, Peter A. Federolf, Ana Francisca Rozin Kleiner, 2021-03-04 *Postindustrial East Asian Cities* Shahid Yusuf, Kaoru Nabeshima, 2006-01-01 Drawing on a wide range of literature and on interviews with firms this book explores issues of economic growth with a focus on six East Asian cities Bangkok Beijing Seoul Shanghai Singapore and Tokyo It suggests how policies and institutions can induce and furnish an urban environment that supports innovative activities A valuable resource for researchers urban planners urban geographers and policy makers interested in East Asia *Globalizing Domain-Specific Languages* Benoit Combemale, Betty H.C. Cheng, Robert B. France, Jean-Marc Jézéquel, Bernhard Rumpe, 2015-10-31 The development of modern complex software intensive systems often involves the use of multiple DSMLs that capture different system aspects Supporting coordinated use of DSMLs leads to what we call the globalization of modeling languages that is the use of multiple modeling languages to support coordinated development of diverse aspects of a system In this book a number of articles describe the vision and the way globalized DSMLs currently assist integrated DSML support teams working on systems that span many domains and concerns to determine how their work on a particular aspect influences work on other aspects Globalized DSMLs offer support for communicating relevant information and for coordinating development activities and associated technologies within and across teams in addition to providing support for imposing control over development artifacts produced by multiple teams DSMLs can be used to support socio technical coordination by providing the means for stakeholders to bridge

the gap between how they perceive a problem and its solution and the programming technologies used to implement a solution They also support coordination of work across multiple teams DSMLs developed in an independent manner to meet the specific needs of domain experts have an associated framework that regulates interactions needed to support collaboration and work coordination across different system domains The articles in the book describe how multiple heterogeneous modeling languages or DSMLs can be related to determine how different aspects of a system influence each other The book includes a research roadmap that broadens the current DSML research focus beyond the development of independent DSMLs to one that provides support for globalized DSMLs
