Endowed Schools Commission,1897      **Congressional Record** United States. Congress,1973      Credit Risk Modeling using Excel and VBA Gunter Loeffler,Peter N. Posch,2011-01-31 It is common to blame the inadequacy of credit risk models for the fact that the financial crisis has caught many market participants by surprise On closer inspection though it often appears that market participants failed to understand or to use the models correctly The recent events therefore do not invalidate traditional credit risk modeling as described in the first edition of the book A second edition is timely however because the first dealt relatively briefly with instruments featuring prominently in the crisis CDSs and CDOs In addition to expanding the coverage of these instruments the book will focus on modeling aspects which were of particular relevance in the financial crisis e g estimation error and demonstrate the usefulness of credit risk modelling through case studies This book provides practitioners and students with an intuitive hands on introduction to modern credit risk modelling Every chapter starts with an explanation of the

methodology and then the authors take the reader step by step through the implementation of the methods in Excel and VBA. They focus specifically on risk management issues and cover default probability estimation, scoring structural models and transition matrices, correlation and portfolio analysis, validation as well as credit default swaps and structured finance. The book has an accompanying website <https://creditriskmodeling.wordpress.com> which has been specially updated for this Second Edition and contains slides and exercises for lecturers.

**COVID-19 in New York City**, Deborah Wallace, Rodrick Wallace, 2020-11-10 This book is the first social epidemiological study of COVID-19 spread in New York City (NYC), the primary epicenter of the United States. New York City spread COVID-19 throughout the United States. The context of epicenter formation determined the rapid, extreme rise of NYC case and mortality rates. Decades of public policies destructive of poor neighborhoods of color heavily determined the spread within the City. Premature mortality rates revealed the weathering of policy-targeted communities, accelerated aging due to chronic stress. COVID attacks the elderly more severely than those under the age of 60. Communities with high proportions of prematurely aged residents proved fertile ground for COVID illness and mortality. The very public policies that created swaths of white wealth across much of Manhattan and parts of Brooklyn destroyed the human diversity needed to ride out crises. Topics covered within the chapters include: Premature Death Rate Geography in New York City; Implications for COVID-19 NYC; COVID Markers at the ZIP Code Level; Prospero's New Castles; COVID Infection and Premature Mortality in the NY Metro Region; Pandemic Firefighting vs. Pandemic Fire Prevention; Conclusion; Scales of Time in Disasters; An exemplary study in health disparities; COVID-19 in New York City; An Ecology of Race and Class Oppression. This is essential reading for social epidemiologists, public health researchers of health disparities, those in public service tasked with addressing these problems, and infectious disease scientists who focus on spread in human populations of new zoonotic diseases. The brief also should appeal to students in these fields, civil rights scholars, science writers, medical anthropologists, and sociologists, medical and public health historians, public health economists, and public policy scientists.
