Retail Geography Shuguang Wang,Paul Du,2020-05-26 The retail sector is an integral part of a national economy From the political economy perspective all consumer goods have surplus values locked up in them the surplus values are not realized until the consumer goods are purchased by consumers through various distribution channels As such retailing is the essential link between production and consumption The success of a retail business depends on two general

factors the location of the retail outlet and management of the business Both factors are equally important If the business is located in the wrong place with the wrong customer base it will not generate expected sales Similarly if the business is poorly managed and operated it will not perform well even if the location is right Influenced by both traditional and new location theories Retail Geography is conceptualized and organized using the retail planning process as the framework The technical and methodological chapters help guide the reader with detailed descriptions of the techniques and are supported with practical examples to reflect the latest software development Retail Geography provides a state of the art summary and will act as a core textbook for undergraduate and graduate students of economic geography interested in specializing in retail and business geography The practical examples also make it a valuable handbook for practitioners in the field as well as students of retail management and commercial real estate management **Community College Review** ,2000

Highway Division. Office of Maintenance,1991 **Openness and Industrial Response in a Wal-Mart World** Beata K. Smarzynska Javorcik,Wolfgang Keller,James R. Tybout,2006 This paper uses a case study approach to explore the effects of NAFTA and GATT membership on innovation and trade in the Mexican soaps detergents and surfactants SDS industry Several basic findings emerge First the most fundamental effect of the NAFTA and the GATT on the SDS industry was to help induce Wal Mart to enter Mexico Once there Walmex fundamentally changed the retail sector forcing SDS firms to cut their profit margins and innovate Those unable to respond to this new environment tended to lose market share and in some cases disappear altogether Second partly in response to Walmex many Mexican producers logged impressive efficiency gains during the previous decade These gains came both from labor shedding and from innovation which in turn was fueled by innovative input suppliers and by multinationals bringing new products and processes from their headquarters to Mexico Finally although Mexican detergent exports captured an increasing share of the U S detergent market over the past decade Mexican sales in the U S were inhibited by a combination of excessive shipping delays at the border and artificially high input prices due to Mexican protection of domestic caustic soda suppliers They were also held back by the major re tooling costs that Mexican producers would have had to incur to establish brand recognition among non Latin consumers and to comply with zero phosphate laws in many regions of the U S **Wal-Mart's Sustainability Strategy** Lyn Denend,2007
