Great Maps Jerry Brotton,2014-09-01 Great Maps takes a close look at the history of maps from ancient maps such as medieval mappae mundi to Google Earth Why do we put north at the top of maps Which maps show us the way to Heaven and which show the land of no sunshine or the land of people with no bowels In Great Maps author and historian Jerry Brotton tells the hidden story behind more than 60 of the most significant maps from around the world picking out key features stories and techniques in rich visual detail to reveal the inner meaning buried within the landscape Maps are not just geographical data they reflect a particular ideological historical or cultural context Providing a unique insight into how mapmakers have used maps to shape and depict their world view this beautifully illustrated book traces the development of human development and culture through its maps From the earliest rock carvings to the latest geospatial technology from ancient medieval mappae mundi to the first road atlas Great Maps explores in stunning photographic detail how maps have influenced and reflected our world throughout history Drawing the Line Mark S. Monmonier,1995 Argues that maps can be manipulated to distort the truth and shows how they have been used for propaganda in international affairs political districting and finding toxic dump sites Rhumb Lines and Map Wars Mark Monmonier,2010-11-15 In Rhumb Lines and Map Wars Mark Monmonier offers an insightful richly illustrated account of the controversies surrounding Flemish cartographer Gerard Mercator s legacy He takes us back to 1569 when Mercator announced a clever method of portraying the earth on a flat surface creating the first projection to take into account the earth s roundness As Monmonier shows mariners benefited most from Mercator s projection which allowed for easy navigation of the high seas with rhumb lines clear cut routes with a constant compass bearing for true direction But the projection s popularity among nineteenth century sailors led to its overuse often in inappropriate non navigational ways for wall maps world atlases and geopolitical propaganda Because it distorts the proportionate size of countries the Mercator map was criticized for inflating Europe and North America in a promotion of colonialism In 1974 German historian Arno Peters proffered his own map on which countries were ostensibly drawn in true proportion to one another In the ensuing map wars of the 1970s and 1980s these dueling projections vied for public support with varying degrees of success Widely acclaimed for his accessible intelligent books on maps and mapping Monmonier here examines the uses and limitations of one of cartography s most significant innovations With informed skepticism he offers insightful interpretations of why well intentioned clerics and development advocates rallied around the Peters projection which flagrantly distorted the shape of Third World nations why journalists covering the controversy ignored alternative world maps and other key issues and how a few postmodern writers defended the Peters worldview with a self serving overstatement of the power of maps Rhumb Lines and Map Wars is vintage Monmonier historically rich beautifully written and fully engaged with the issues of our time *Die dritte Weltkarte* Peter

Although we are accustomed to that convention it is in fact a politically motivated almost entirely subjective way of depicting a ball spinning in space As *The Power of Projections* teaches us maps do not portray reality only interpretations of it To begin with they are two dimensional projections of a three dimensional spherical Earth Add to that the fact that every map is made for a purpose and its design tends to reflect that purpose Finally a map is often a psychological projection of the historical political and cultural values of the cartographer or of the nation person or organization for which the map was created In this fascinating book Klinghoffer examines the world perceptions of various civilizations and the ways in which maps have been formulated to serve the agendas of cartographers and their patrons He analyzes the recent decline of sovereignty the spread of globalization the reassertion of ethnic identity and how these trends affect contemporary mapmaking *Gaia, an Atlas of Planet Management* Norman Myers,1993 For the first time since its publication in 1984 a completely updated and revised edition of this best selling atlas which brings it into the 1990s incorporating the new events issues and statistics of the past decade *New Statesman Society* ,1990-10 **Map Link Catalog** ,2006
