Roland, Jacques Bernier, 2010-11-22 Volume Two of this retrospective bibliography is both a continuation and an expansion of Volume One 1984 It contains references to Canadian medical historical literature published between 1984 and 1998 and also includes much additional material published prior to 1984 Finally it substantially enlarges the content of French language material Every effort has been made to be as inclusive as possible of articles theses book chapters and books both in English and in French relating to the history of medicine No single electronic source can replace this bibliography The contents are divided into three sections The first is a listing of material expressly biographical Section two lists material under a wide variety of subject headings related to medicine and the third is a complete listing of the authors who have contributed these articles Simply organized and easy to use this bibliography will be of value to historians archivists librarians and anyone interested in the history of medicine *National Library of Medicine Current Catalog* National Library of Medicine (U.S.), 1990 **The Museum** Michael S. Sharpiro, 1990-07-24 This critical bibliography of museum studies comprises an organized collection of essays on the various types of museums art natural history history science and technology and folk and on general aspects collections education exhibitions etc that cut across the media Most of the essays are cogent substantial if not comprehensive and clear The editor has taken care to see that they follow a similar format of historical essay followed by a full bibliography of items discussed Library Journal As the number of museums in the United States has grown to more than 6500 in this century the museum profession has experienced similar growth In addition to academic training and accreditation programs in the field an expanding body of literature on museum history philosophy and functions has evolved little of which has received the critical attention it deserves This reference volume serves as an up to date guide to this wealth of literature identifying and evaluating works that introduce the general reader the museum studies student and the beginning professional to the history philosophy and functions of museums The volume presents a series of informative historical outlines and critical bibliographic essays on all aspects of museum history philosophy and functions Contributors treat such subjects as art museums natural history museums science and technology museums history museums collections exhibition education and interpretation and the public and museums Each chapter consists of an introductory historical narrative a survey of sources and a bibliographic checklist that contains cited and additional sources A set of appendices include a geographically organized bibliography of museum directories a guide to

archives and special collections and a selective list of museum related periodicals The book concludes with a comprehensive general subject index This work will be an important reference tool for museum professionals and cultural historians as well as for courses in museum studies It will also be a valuable addition to both academic and public libraries Current Catalog National Library of Medicine (U.S.), First multi year cumulation covers six years 1965-70 Library Catalog of the Metropolitan Museum of Art, New York, Second Edition, Revised and Enlarged Metropolitan Museum of Art (New York, N.Y.). Library, 1985 Glass Collections in Museums in the United States and Canada Corning Museum of Glass, International Association for the History of Glass. American National Committee, 1982 Social History in Museums David Fleming, Crispin Paine, John G. Rhodes, 1993 This manual contains contributions by 30 museum professionals from a wide range of specialisms with chapters that range from The Decorative Art Approach to The Agricultural History Approach to Oral History Excavation Archaeology Photographs and Films and Period Rooms The discipline of social history is in academic terms very young and its introduction into museums is a recent phenomenon While both these factors lie behind the contributions to this volume and definitions are fluid controversy rife confidence is nonetheless high The wealth of material reflects the growth in the museum movement since the 1940s and the concern of curators to ensure that museums are popular and relevant in their communities Bibliography of the History of Medicine, 1990 **Pharmacy in History**, 1989 **America's Science Museums** Victor J. Danilov, 1990-11-29 Danilov is a preeminent authority on museums According to Danilov visits to science related museums constitute 38 to 45 percent of all visits to museums in the U S At the beginning of each section there is an introduction describing the history of that particular type of museum Museum entries vary from about one half page to two pages in length A typical entry provides a history of the museum and description of the collection America's Science Museums is a well designed book that can be recommended to all public and academic libraries Reference Books Bulletin Science museums although they comprise less than 20 percent of the nearly 7 000 cultural institutions known as museums in the United States have become America's most popular type of museum From New Bedford to Waikiki America's Science Museums assesses the nation's scientific and technological museums and related institutions examining their histories operations and offerings This reference volume looks at the many different types of such institutions including some that are not called museums but that are museum like in their operations such as aquariums botanical gardens arboreta planetariums and zoos In addition some related facilities such as marine life and wildlife parks and research sites with visitor centers such as observatories and NASA space centers are included Most of the museums described in the twelve sections of this unique comprehensive guide were selected because of their stature in the field while others were included because of their age specialty or novelty Overall the museums detailed here represent a cross section of the rapidly expanding science museum field and they illustrate why science museums have become so popular and instrumental in furthering science literacy across the U S The book's twelve sections focus on aquariums marine museums

and marine life parks aviation and space museums botanical gardens conservatories and arboretums industrial history museums maritime and naval museums medical and health museums natural history museums planetariums and observatories science and technology centers transport automobile and railway museums zoos and wildlife parks and other science technology museums Thorough descriptions of the 480 museums and related institutions provide comparative information on the nature development facilities collections and offerings of each An ideal reference for college courses dealing with the history philosophy collections exhibits operations and management of museums and for other researchers seeking background information and insight into the special merits of the leading institutions in the fields of science and technology
